136	Average Monthly Benefit Amounts
143	Retirees and Beneficiaries Tabulated by Fiscal Year of Retirement
145	Benefits Tabulated by Attained Ages of Benefit Recipients
147	Principal Participating Employers

Introductory Section

Being named one of the Best Places to Work in 2024 by the money management industry reflects more than just workplace culture—it reflects purpose. At MOSERS, empowering employees leads to better service, encourages innovation, boosts operational efficiency, and builds a valuable, trusted workforce. This recognition reminds us that when people thrive, so does the mission—and the impact lasts for generations.

Professional Awards

Certificate of Achievement for Excellence in Financial Reporting

MOSERS *Annual Comprehensive Financial Report* (ACFR) for the fiscal year ended June 30, 2024, was awarded the Certificate of Achievement for Excellence in Financial Reporting by the Government Finance Officers Association of the United States and Canada (GFOA). This was the 36th consecutive year that MOSERS has received this prestigious award. The Certificate of Achievement is the highest form of recognition for excellence in state and local government financial reporting. To be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized financial report. The ACFR must satisfy generally accepted accounting principles, applicable legal requirements, and GFOA reporting standards.

Public Pension Standards Award

MOSERS received the Public Pension Standards Award from the Public Pension Coordinating Council (PPCC) in 2024 in recognition of meeting professional standards for plan design and administration as set forth in the Public Pension Standards. This award is presented by the PPCC, a confederation of the National Association of State Retirement Administrators (NASRA), the National Conference on Public Employee Retirement Systems (NCPERS), and the National Council on Teacher Retirement (NCTR).

October 23, 2025

The Board of Trustees
Missouri State Employees' Retirement System
907 Wildwood Drive
Jefferson City, MO 65109

To the Board of Trustees and Members of MOSERS:

We are pleased to submit the *Annual Comprehensive Financial Report* of the Missouri State Employees' Retirement System (MOSERS or the System) for the fiscal year ended June 30, 2025. During fiscal year 2025, the Board and staff worked extensively and collaboratively on solutions to ensure the fiscal sustainability of MOSERS for current and future members. I would like to thank our trustees for their dedication and commitment.

This ACFR is designed to provide an overview of the financial condition of MOSERS while also satisfying the reporting requirements of state law as stipulated in Sections 104.480, 104.1006, and 105.661 of the Revised Statutes of Missouri (RSMo), as amended. In addition to the *Introductory Section*, the MOSERS ACFR also contains a *Financial Section*, *Investment Section*, *Actuarial Section*, and *Statistical Section*. This report is available on our website at www.mosers.org.

Profile of MOSERS

MOSERS is a cost-sharing, multiple-employer defined benefit pension plan that was established in 1957 by state law for the purpose of providing retirement benefits to most state employees. MOSERS is governed by an 11-member Board of Trustees (the Board). As of June 30, 2025, MOSERS serves 45,100 active employees and pays 57,133 benefit recipients across the Missouri State Employees Plan (MSEP) and the Judicial Plan.

In addition to retirement benefits, MOSERS administers term life and long-term disability insurance for most state employees. MOSERS provides these benefits through insured plans with The Standard Insurance Company (The Standard). We maintain membership information on those eligible and manage a custodial fund to track premiums collected from employers and payments made to The Standard.

MOSERS oversees the State of Missouri Deferred Compensation Plan (MO Deferred Comp). We administer this plan through a contractual relationship with MissionSquare Retirement as the third-party record keeper. We will be transitioning to a new record keeper during fiscal year 2026. The plan provides various investment options to participants who retain responsibility for the investment of their individual accounts. MO Deferred Comp activity and administrative costs are reported via separate audited financial statements.

Additionally, MOSERS oversees the Colleges and Universities Retirement Plan (CURP), a mandatory 401(a) defined contribution plan for education employees hired after June 30, 2002, by the regional universities that participate in MOSERS. TIAA is responsible for third-party administration and for providing investment products to plan members. The activities of CURP are not included within this report.

Financial Statements

The financial statements in this report were prepared in accordance with accounting principles generally accepted in the United States. Management is responsible for the preparation of this report and the fairness and integrity of the information presented herein. Some amounts included in the financial statements and elsewhere may be based on estimates and judgments. Management is responsible for maintaining a system of adequate internal controls designed to provide reasonable, but not absolute, assurance that assets are properly safeguarded and that the financial statements are fairly stated. We believe that the internal controls currently in place support this purpose and that the financial statements and accompanying schedules are fairly presented in all material respects.

Eide Bailly, LLP, our independent external auditors, conducted an audit of the *Basic Financial Statements* in accordance with U.S. generally accepted auditing standards. This audit and the financial statements and related notes are presented in the *Financial Section* of this report.

Management's Discussion and Analysis in the *Financial Section* serves as an introduction to and overview of the financial statements. Additional financial information can be found in the financial statements and schedules included in the *Financial Section* of this report.

MOSERS retirement funds are component units of the state of Missouri for financial reporting purposes and as such, the financial statements in this report are also included in the *Annual Comprehensive Financial Report* of the state of Missouri.

Investments

The MOSERS investment portfolio generated a time-weighted return of 9.8%, net of fees, for fiscal year 2025. The total fund returned 1.1% more than would have been expected through passive investing in the benchmarks.

The MOSERS Board of Trustees has adopted investment objectives, investment philosophies, and a strategic asset allocation to guide all investment-related decisions. Investment objectives strive to maintain stable and reasonable contribution rates over long periods of time, while maximizing investment return by exposing assets to a prudent level of risk. Last fiscal year, the Board took part in an asset-liability study and ultimately selected a new policy portfolio. Implementation of the new portfolio was initiated in fiscal year 2025 and will be completed next fiscal year. Additional detailed information regarding MOSERS' investments, including policies and strategies, can be found in the *Investment Section* of this report.

Actuarial Information

The Board contracts with CavMac to perform an actuarial valuation of each plan every year. The valuations use economic and demographic assumptions adopted by the Board based upon experience studies conducted at least every five years. The most recent full experience study was adopted effective June 30, 2021.

To allow for more predictable and stable contribution rates, MOSERS' funding is based upon the actuarial value of assets, which smooths asset gains and losses over a five-year period. As of June 30, 2025, the MSEP was 55.4% pre-funded and the Judicial Plan was 31.1% pre-funded on an actuarial basis. The MSEP reflected an increase compared to the June 30, 2024, funded status of 55.3%. The Judicial Plan reflected an increase from the June 30, 2024 funded status of 31.0%.

In 2023, the Board voted to set the minimum employer contribution rate to 28.75% of pay in fiscal year 2025, 30.25% of pay in fiscal year 2026, and 32% of pay thereafter. The minimum contribution rate expires once the System reaches a funded ratio of 80%.

The required certification letter from the Board's retained actuary is included at the beginning of the *Actuarial Section*. Additional information regarding the financial condition of the pension trust funds can be found in the *Actuarial Section* of this report.

Legislative Changes

- **House Bill 5** – The General Assembly authorized the appropriation of \$817 million to the Office of Administration to pay the required employer contribution payments to MOSERS in fiscal year 2026 to fund the MSEP, the Judicial Plan, life insurance premiums, and long-term disability premiums. The bill also appropriated \$34.8 million to fully fund the deferred compensation employer match of up to \$75 per month (with a minimum contribution of \$25 per month).

Administrative Initiatives

MOSERS' staff engaged in several administrative initiatives during the year. The more notable items are listed below.

- **New Pension Administration System** – MOSERS successfully implemented a new pension administration system (PAS) on April 14, 2025. MOSERS partnered with Tegrit Software Ventures, Inc. and successfully implemented its Arrivos 2.0 PAS. This project came in under budget. The new myMOSERS member portal features increased functionality and security enhancements, including multi-factor authentication. The system provides enhanced functionality for staff, members, and employers.
- **MOSERS' Strategic Plan** – In fiscal year 2025, the four open initiatives from the 2023 - 2025 strategic plan were implemented.
 - Completed a cross-training initiative to ensure that critical business functions continue during periods of disruption.
 - Fulfilled all necessary steps to file plan documentation with the IRS.
 - Conducted training for the new pension administration system.
 - Performed full backup and replication test of the new pension administration system.

Additionally, the MOSERS Board of Trustees approved a new organization-wide strategic plan for a five-year cycle beginning July 1, 2026, through June 30, 2030. Three major themes highlight nine initiatives that make up the new plan: Service Excellence, Operational Efficiency, and Great Place to Work.

- **Expanded Outreach to Department of Corrections' Active Members** – MOSERS expanded member education and outreach to our largest employer, the Missouri Department of Corrections (DOC). Due to workplace demands, this member population routinely struggles to attend our traditional educational and counseling options. In fiscal year 2025, more than 800 members from the DOC attended education seminars or one-on-one counseling at their workplace.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to MOSERS for its Annual Comprehensive Financial Report for the fiscal year ended June 30, 2024. This was the 36th consecutive year that MOSERS has received this prestigious award. To be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized Annual Comprehensive Financial Report. The report must satisfy generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only. We believe that our current Annual Comprehensive Financial Report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

MOSERS received the Public Pension Coordinating Council (PPCC), Public Pension Standards Award, in recognition of meeting the professional standards for plan design and administration as set forth in the Public Pension Standards. This award is presented by the PPCC, a confederation of the National Association of State Retirement Administrators (NASRA), the National Conference on Public Employee Retirement Systems (NCPERS), and the National Council on Teacher Retirement (NCTR).

Introductory Section

MOSERS was named one of the Best Places to Work in Money Management by *Pensions & Investments* (P&I) magazine for 2024. This influential awards program is dedicated to identifying and recognizing the best employers in the money management industry. This is the first time MOSERS has received this honor. Only two other public pension plans were recognized.

MOSERS received an award from the National Association of Government Communicators (NAGC). This first-place honor award was received in the Digital Communications/Website category for MOSERS Month 2024. The Blue Pencil & Gold Screen Competition is an annual international awards program that recognizes superior government communication products and those who produce them at all levels of government.

The State of Missouri Deferred Compensation Plan received a National Association of Government Defined Contribution Administrators (NAGDCA) Leadership Award for their 2024 National Retirement Security Month "Cybersecurity, it Starts with You" campaign and a *Pensions & Investments* Eddy Awards for their efforts with the 2023 National Retirement Security Month "Retirement Security. It Starts with You" campaign.

These prestigious awards recognize MOSERS for achieving financial and professional standards of excellence and reflect the dedication and competence of the MOSERS staff.

Conclusion

This report is a product of the combined efforts of the MOSERS staff and advisors functioning under the Board's leadership. It is intended to provide complete and reliable information that facilitates the management decision-making process, serves as a means for determining compliance with legal requirements, and allows for the evaluation of responsible guardianship of System funds.

Digital copies of this report are provided to the Governor, State Auditor, and the Joint Committee on Public Employee Retirement of the General Assembly. Their support contributes to the success of MOSERS.

About MOSERS

Purpose

MOSERS was established on September 1, 1957, and is governed by the laws of the state of Missouri.

MOSERS administers retirement, survivor, life insurance, and long-term disability benefits, as well as deferred compensation plan management to its members.

MOSERS administers benefits for most state employees, including general state employees, employees of 10 regional colleges and universities, members of the Missouri General Assembly, statewide elected officials, judges, administrative judges, and legal advisors. MOSERS is responsible for administering benefits as set forth in state law and bears a fiduciary obligation to the state employees who are its members.

Administration

State law provides that responsibility for the administration of MOSERS is vested in an 11-member Board of Trustees. The Board is comprised of the following:

- Two members of the Senate appointed by the President Pro Tem of the Senate;
- Two members of the House of Representatives appointed by the Speaker of the House;
- Two members appointed by the Governor;
- The State Treasurer;
- The Commissioner of Administration; and
- Three System members: two active members elected by the active and inactive-vested members, and one retiree elected by the retired members.

Introductory Section

The day-to-day management of MOSERS is delegated to the executive director who is appointed by the Board. The executive director acts as advisor to the Board on all matters pertaining to the System, and employs the remaining staff needed to manage the System.

Organization

The executive director, chief operating officer, and chief investment officer are responsible for planning, organizing, and administering the operations of the System under the broad policy guidance and direction of the Board.

Executive

The executive staff provides administrative support by assisting the executive director in the major legal, financial, operational, and oversight functions. Human resources, which includes oversight of general building maintenance, is also represented in this section. Responsible for business continuity preparation and planning, this section also coordinates activities and processes for the organization that facilitate strategic thinking, planning, and implementation.

Accounting

The staff in this section are responsible for all financial records of the programs administered by MOSERS, including the preparation of financial and statistical reports and purchasing functions for MOSERS. This team works with the investment custodian, internal investment managers, Office of Administration accounting team, state of Missouri, actuaries, banks, and the IRS.

Benefits Administration

Staff in the benefits administration section are responsible for all member data, benefit verifications and inception, as well as contact with members regarding the benefit programs administered by MOSERS (retirement, life insurance, and long-term disability insurance).

Communications and Education

Communications and education staff are responsible for presenting information in clear and concise ways to facilitate effective and well-informed decision-making, planning, and action. They produce materials for members regarding the benefits administered by MOSERS, including publications such as newsletters, handbooks, forms, and brochures. This team works in conjunction with information technology staff on electronic materials and tools such as the public, Board, secure member, and internal websites, social media, and member emails. This team also conducts educational seminars in multiple cities around the state each year and hosts webinars to inform members about their MOSERS benefits.

Employer Services

Staff in the employer services section facilitate the collection of member and employer contributions, maintain member benefit eligibility records, and provide technical assistance and general education to employer representatives regarding the timely and accurate submission of payroll and benefit eligibility data.

Information Technology

Staff in this section provide computer and technical design support for MOSERS' administrative activities. This team is responsible for developing and maintaining the automated systems used to administer benefits. They are also responsible for the document imaging system, network and data security, unified communication system, and personal computers.

Internal Audit

Internal audit staff are responsible for identifying and managing MOSERS' risks and ensuring policies, procedures, and controls are in place and working effectively. They improve MOSERS' operations by strengthening the organization and protecting stakeholders.

Investments

The investments staff oversees and implements MOSERS' investment program. Primary functions include managing assets internally, selecting external managers for portions of the portfolio, researching and implementing portfolio allocation shifts and rebalancing, providing technical advice, serving as a liaison to the investment community, and informing and advising the Board and executive director on financial, economic, and political developments that may affect the System. This team works closely with external investment consultants, legal counsel, and the executive director.

Financial Section

MOSERS exists to advance the financial security of its members. Our strategic plan not only reflects this mission but also guides our decision-making, improves transparency, and strengthens the long-term sustainability of the System. It ensures we stay focused on both the needs of today and the promises we must keep for decades to come.

Independent Auditor's Report

To the Board of Trustees
Missouri State Employees' Retirement System
Jefferson City, Missouri

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of pension funds and custodial fund of the Missouri State Employees' Retirement System (MOSERS), a pension (and other employee benefit) trust fund of the state of Missouri, as of and for the year ended June 30, 2025, and the related notes to the financial statements, which collectively comprise MOSERS' basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the respective fiduciary net position of the pension funds and custodial fund of MOSERS, as of June 30, 2025, and the respective changes in fiduciary net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States (*Government Auditing Standards*). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of MOSERS and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about MOSERS' ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

eidebailly.com

877 W. Main St., Ste. 800 • Boise, ID 83702-5858 • T 208.344.7150 • F 208.344.7435 • EOE

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of MOSERS' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about MOSERS' ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplementary information on pages 20-23 and 52-60 be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with GAAS, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the MOSERS *Basic Financial Statements*. The additional supplementary information accompanying financial information listed as additional supplemental schedules in the table of contents are presented for purposes of additional analysis and are not a required part of the *Basic Financial Statements*. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the *Basic Financial Statements*. The information has been subjected to the auditing procedures applied in the audit of the *Basic Financial Statements* and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the *Basic Financial Statements* or to the *Basic Financial Statements* themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the additional supplementary information accompanying financial information listed as additional supplemental schedules in the table of contents are fairly stated, in all material respects, in relation to the *Basic Financial Statements* as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the *Introductory, Investment, Actuarial, and Statistical Sections* but does not include the *Basic Financial Statements* and our auditor's report thereon. Our opinion on the *Basic Financial Statements* does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the *Basic Financial Statements*, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated October 23, 2025, on our consideration of the MOSERS internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of MOSERS' internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering MOSERS' internal control over financial reporting and compliance.

A handwritten signature in black ink that reads "Eide Bailly LLP". The signature is written in a cursive, flowing style.

Management's Discussion and Analysis

This discussion and analysis of the Missouri State Employees' Retirement System (MOSERS) provides an overview of the retirement system's financial activities for the fiscal year ended June 30, 2025. It is intended to be used in conjunction with the *Transmittal Letter* beginning on page 6 and *Basic Financial Statements and Notes to the Basic Financial Statements*, beginning on page 24 of this report.

Using This Financial Report

This *Annual Comprehensive Financial Report* (ACFR) reflects the activities of MOSERS as reported in the *Statements of Fiduciary Net Position* and the *Statements of Changes in Fiduciary Net Position*, which begin on page 24. These statements are prepared in conformity with generally accepted accounting principles. The *Notes to the Basic Financial Statements* are an integral part of the financial statements and include additional information not readily evident in the statements themselves. The *Required Supplementary Information* (RSI) and *Additional Financial Information* following the *Notes to the Basic Financial Statements* provide historical information and additional details considered useful in evaluating the condition of the plan.

See the *Actuarial Section* of this report for a detailed discussion of the actuarial value of assets and liabilities and the funded status of the plans.

The *Basic Financial Statements* contained in this section of the ACFR consist of:

- The *Statements of Fiduciary Net Position* report the fiduciary funds' assets, deferred outflows, liabilities, deferred inflows, and resulting net position, where total assets plus deferred outflows less current liabilities and deferred inflows equal net position held in trust for future pension benefits available at the end of the fiscal year. It is a snapshot of the financial position of the fiduciary funds at that specific point in time.
- The *Statements of Changes in Fiduciary Net Position* summarize the fiduciary funds' financial transactions that have occurred during the fiscal year where additions less deductions equal the change in net position. It supports the change that has occurred from the prior year's net position on the *Statements of Fiduciary Net Position*.
- The *Notes to the Basic Financial Statements* are an integral part of the above financial statements and include additional information not readily evident in the statements themselves.

Funding Analysis

Funded status is presented using two different valuation methods within this document for two different purposes. One valuation method is for the purpose of determining contribution rates and the other method is required by Governmental Accounting Standards Board (GASB) Statement 67, *Financial Reporting for Pension Plans*, to provide information about the net pension liability as of a specific point in time using the fair value of investment assets. The valuation method used for determining contribution rates smooths investment activity over a period of five years to minimize the impact investment market volatility can have on contribution rates.

Funding Methodology for Determining Contribution Rates

The unfunded actuarial accrued liability (UAAL) for the Missouri State Employees' Plan (MSEP) increased by approximately \$192 million from \$7.6 billion at June 30, 2024, to \$7.8 billion at June 30, 2025. Our actuarial accrued liability experience was a little more consistent with our actuarial assumptions than last year with only a 1.3% experience loss on actuarial accrued liabilities. Like last year, salary increases for active members and cost of living adjustments for retired members exceeded assumptions. These were the primary factors driving the increase in the UAAL.

The actuarially smoothed rate of return of 6.2% was a little under our 6.95% assumed rate of return, resulting in 0.4% actuarial loss. Even though there were slight actuarial losses on assumptions, the funding percentage of the MSEP plan increased from 55.3% to 55.4%.

The UAAL for the Judicial Plan increased by \$14 million from \$466 million at June 30, 2024, to \$480 million at June 30, 2025, with an increase in funded percentage from 31.0% to 31.1%.

The assumed rate of investment return, net of investment expense, was 6.95% for both the MSEP and the Judicial Plan.

Financial Reporting Methodology required by GASB Statement 67

The fund net position as a percentage of total pension liability increased from 52.0% at June 30, 2024, to 53.8% at June 30, 2025, for the MSEP Fund, and increased from 29.12% to 30.27% for the Judicial Plan Fund. See the *Required Supplementary Information* section of this report for more information about net pension liability and related information.

Financial Reporting Highlights

The *Summary Comparative Statements of Fiduciary Net Position*, and the *Summary Comparative Statements of Changes in Fiduciary Net Position* presented below are designed to provide the reader of this report with a high level overview of MOSERS' financial activity and net position.

Summary Comparative Statements of Fiduciary Net Position

	As of June 30, 2025	As of June 30, 2024	Amount of Change	Percentage Change
Assets				
Administrative operating cash and equivalents	\$ 7,939,565	\$ 16,374,267	\$ (8,434,702)	(51.51%)
Receivables	1,159,727,469	682,177,634	477,549,835	70.00
Investments	10,899,610,931	12,303,351,397	(1,403,740,466)	(11.41)
Capital assets, net of accumulated depreciation	18,893,447	16,728,940	2,164,507	12.94
Total assets	12,086,171,412	13,018,632,238	(932,460,826)	(7.16)
Deferred outflow of resources	1,193,520	1,008,133	185,387	18.39
Liabilities				
Administrative and other payables	8,526,028	18,426,077	(9,900,049)	(53.73)
Investment related payables and obligations	2,502,418,380	3,993,980,968	(1,491,562,588)	(37.35)
MOSERS investment portfolio liability (MIP)	2,742,513	3,838,147	(1,095,634)	(28.55)
Net OPEB liability	6,086,710	5,574,870	511,840	9.18
Total liabilities	2,519,773,631	4,021,820,062	(1,502,046,431)	(37.35)
Deferred inflow of resources	1,790,687	2,185,471	(394,784)	(18.06)
Net position restricted for fiduciary activities	\$ 9,565,800,614	\$ 8,995,634,838	\$ 570,165,776	6.34

The largest components of the net position of the pension trust funds are investments and investment related receivables and liabilities. The majority of MOSERS' receivable balances are comprised of investment related transactions, such as pending trade settlements and interest and dividends receivable. Investment related liabilities include payables for investments purchased, manager fees payable, and obligations under repurchase agreements.

MOSERS investment portfolio liability (MIP) represents the amount MO Deferred Comp Plan participants have invested in MOSERS' portfolio. As of June 30, 2025, the MIP investment option was in the process of being terminated, and all participants were required to redeem their MIP balances. Because of this, the MIP liability was almost 29% less than it was as of June 30, 2024.

The investment portfolio, which includes investments, and investment related receivable and liability balances experienced positive performance this year. MOSERS experienced a 9.75% time-weighted return on plan assets. MOSERS, like other mature pension plans, relies in part on cash flow generated from investments to fund benefit payments.

Another noteworthy change in MOSERS' *Statement of Fiduciary Net Position* is the increase in capital assets related to the development of our new pension administration system. MOSERS capitalized approximately \$2.4 million in project costs incurred during the year. The new pension administration system was fully implemented in April 2025, and these capitalized software development project costs began to be amortized over the estimated useful life of the system.

Summary Comparative Statements of Changes in Fiduciary Net Position

	Year Ended June 30, 2025	Year Ended June 30, 2024	Amount of Change	Percentage Change
Additions				
Contributions	\$ 903,803,944	\$ 811,296,711	\$ 92,507,233	11.40%
Net investment income	854,635,369	569,520,077	285,115,292	50.06
Miscellaneous income	481,126	481,148	(22)	0.00
Total additions	1,758,920,439	1,381,297,936	377,622,503	27.34
Deductions				
Benefit payments	1,123,094,440	1,070,147,669	52,946,771	4.95
Premium disbursements	36,423,636	34,574,075	1,849,561	5.35
Service transfers and refunds	15,333,544	16,708,833	(1,375,289)	(8.23)
Administrative expenses	13,903,043	12,465,384	1,437,659	11.53
Total deductions	1,188,754,663	1,133,895,961	54,858,702	4.84
Net increase	570,165,776	247,401,975	322,763,801	130.46
Net position beginning of year	8,995,634,838	8,748,232,863	247,401,975	2.83
Net position restricted for fiduciary activities	<u>\$ 9,565,800,614</u>	<u>\$ 8,995,634,838</u>	<u>\$ 570,165,776</u>	6.34

Investment Results

MOSERS' total fund net position increased by \$0.6 billion, ending at \$9.6 billion in fiscal year 2025. Net position increased slightly from last year, driven primarily by investment returns. The fund returned a time-weighted return of 9.75% in fiscal year 2025 compared to 6.59% in fiscal year 2024.

Portfolio returns were led by the Global Public Equities allocation which came in at 17.7%, outperforming its benchmark by more than 1.5%. Private Credit and Hedge Funds were also strong performers on both a nominal and relative basis, returning 8.9% and 8.7%, respectively. The Long Treasury portfolio, which is held primarily for its defensive and diversifying characteristics, continued to be a slight drag on the portfolio in the recent higher inflation and increasingly volatile interest rate environment.

As further discussed in the *Investment Section* of this report, we continue to recognize the importance of diversifying our investment assets to contribute to our long-term success.

It is also important to note that investment gains and losses are actuarially smoothed over a 5-year period to prevent market volatility from causing significant year-to-year changes in the contribution rate.

The *Investment Section* of this report contains additional information regarding investments activity.

Contribution Revenue

Contribution revenue increased by 11.4% from the prior year. This increase in contribution revenue is primarily due to two factors: the contribution rate increased, and the covered payroll of active benefit-eligible employees increased. The contribution rate is set in advance; however, unexpected changes in covered payroll can cause contribution revenue to come in above or below expectation.

The employer retirement contribution rates for the MSEP members is a primary driver for total fund contributions revenue. This rate increased from 27.26% in fiscal year 2024 to 28.75% in fiscal year 2025. The employee contribution rates for 2011 tier members is set by statute at 4% of gross pay. The percent of MSEP 2011 tier members who contribute 4% continues to grow every year to make up a larger percentage of our overall membership base. As of June 30, 2025, 69% of the active membership population were MSEP 2011 members.

Covered payroll is the other primary factor that ultimately determines our contribution revenue. The active MSEP membership base remained similar to that reported last fiscal year, which was close to levels immediately preceding the pandemic. Active MSEP member covered payroll increased this year by 3%. This increase was greater than our actuarial assumptions of 2.25%.

Judicial Plan contributions and Insurance fund premium contributions each account for less than 10% of total fund contributions revenues. Covered payroll for judges increased 5.5% over last year based on the actuarial valuation report. Judges contributions revenue was almost 10% greater than last year because of the increase in covered payroll. In addition, the active membership population was comprised of 82% of Judicial Plan 2011 tier members compared to 77% last year. Insurance fund premium contributions were also higher than the prior year.

The *Actuarial Section* of this report contains more information about our actuarial assumptions and experience.

Benefits Expenses

Benefit payment expenses were 4.95% greater than the prior year due to a growing retiree population and cost-of-living adjustments (COLAs).

The population of retirees receiving benefits continued to grow during the fiscal year. A growing retiree population puts upward pressure on the contribution rate. Schedules of retirees added and removed from the benefit rolls can be viewed on pages 102-103 of the *Actuarial Section* of this report.

COLAs provided to existing benefit recipients also cause benefit expenses to increase each year. Members employed before August 28, 1997, who retired under the MSEP, receive a COLA of at least 4% each year (maximum 5%) until they reach their COLA cap. For general state employees, COLAs are based on 80% of the percentage increase in the average Consumer Price Index (CPI) from one year to the next. The maximum increase is 5% (minimum 0%). The cost-of-living adjustment for fiscal year 2025 was 2.359%.

Administrative Expenses

Administrative expenses totaled \$13.9 million in fiscal year 2025 compared to \$12.5 million in fiscal year 2024. MOSERS experienced an increase in administrative expense mainly due to increases in personnel services, fringe benefits, and professional services.

Requests for Information

This financial report is designed to provide a general overview of the System's finances for all those who are interested. Questions concerning any of the information provided in this report or requests for additional information should be addressed to MOSERS, at P.O. Box 209, Jefferson City, MO 65102 or by email at sunshinelawrequest@mosers.org.

See accompanying *Notes to the Basic Financial Statements*.

Notes to the Basic Financial Statements

Note 1 – Plan Descriptions and Contribution Information

The MSEP and the Judicial Plan are pension plans covering substantially all state of Missouri employees and judges.

Missouri State Employees' Plan (MSEP)

The MSEP is a cost-sharing multiple-employer, defined benefit public employee retirement plan with two benefit structures known as the MSEP (closed plan) and MSEP 2000 (which includes the MSEP 2011 tier), which are administered by the Missouri State Employees' Retirement System (MOSERS) in accordance with Sections 104.010 and 104.312 to 104.1215 of the Revised Statutes of Missouri (RSMo). As established under Section 104.320, RSMo, MOSERS is a body corporate and an instrumentality of the state. The System is vested with the powers and duties specified in Sections 104.010 and 104.312 to 104.1215, RSMo, and such other powers as may be necessary or proper to enable it, its officers, employees, and agents to carry out fully and effectively all the purposes of Sections 104.010 and 104.312 to 104.1215, RSMo.

Responsibility for the operation and administration of the System is vested in the 11-member MOSERS Board of Trustees (the Board) as defined by state law. Due to the nature of MOSERS' reliance on funding from the state of Missouri and the overall control of the plan document by the legislative and executive branches of state government, the MSEP is considered a component unit of the state of Missouri.

The Board intends to follow a financing pattern that computes and requires contribution amounts that are expressed as a percent of active member payroll and will remain approximately level from year to year and from one generation of citizens to the next. For the year ended June 30, 2025, the employer contribution rate was 28.75% of covered payroll.

Complete recognition of the year-to-year swings in the fair value of System assets would produce contribution rate changes that would run counter to the "approximately level" goal. A common actuarial practice, referred to as asset smoothing, is used to address that issue. Recognizing the difference between the actual and assumed investment returns over a closed, five-year period helps ensure a more stable contribution rate.

At any point in time, the actuarial value of assets will be more or less than the fair value, but if the smoothing method is prudent and properly constructed, those values will converge over time. As of June 30, 2025, the ratio of actuarial value of assets to fair value of assets was 103.09% for the MSEP.

Per the June 30, 2025, actuarial valuation, membership in the MSEP consisted of the following:

Retirees and beneficiaries currently receiving benefits		56,494
Active		
Vested	24,482	
Nonvested	20,191	44,673
Inactive		
Vested (not yet receiving benefits)*	17,943	
Nonvested (with contribution balances)	38,869	56,812
Total membership		157,979

** Includes 280 members on leave of absence and 456 members on long-term disability*

Generally, all full-time state employees employed before July 2000, who became vested and were not covered under another state-sponsored retirement plan, are eligible for membership in the MSEP (closed plan). Full-time state employees who were employed after July 1, 2000, but before January 1, 2011, are members of the MSEP 2000.

Those first employed in a benefit-eligible position on or after January 1, 2011, are members of the MSEP 2011 tier of the MSEP 2000.

MOSERS participates as an employer in the MSEP and MSEP 2000, including the MSEP 2011 tier.

Unless otherwise delineated, data for the MSEP is inclusive of members in the MSEP 2000 and MSEP 2011, which all provide defined benefit pension, survivor, life insurance, and long-term disability benefits.

Employer contributions for the MSEP are determined through annual actuarial valuations. The required contributions are expressed as a percentage of covered payroll. The state of Missouri and its component employers make required contributions to the plans. Employer contributions for the fiscal year ended June 30, 2025, were 28.75% of covered payroll. Members of MSEP and MSEP 2000 do not make employee contributions. Members of MSEP 2011 tier are required to contribute 4% of covered payroll.

Final average pay (FAP) is the average pay of a member for the 36 full, consecutive months of service before termination of employment when the member's pay was greatest. If the member was on workers compensation leave of absence or medical leave of absence due to an employee illness, or on long-term disability, FAP is the amount of pay the member would have received, but for such leave of absence as reported and verified by the employing department. If the member was employed for less than 36 months, FAP is the average monthly pay of a member during the period for which the member was employed.

For a summary of benefits for general state employees, legislators, and statewide elected officials under the MSEP, MSEP 2000, and MSEP 2011 tier, refer to the *Summary of Plan Provisions* in the *Actuarial Section* of this report.

MSEP (closed plan)

General state employees are fully vested for benefits upon accruing five years of credited service. Under the MSEP, general employees may retire with full benefits upon the earliest of attaining:

- Age 65 with 5 years of service; or
- Age 60 with 15 years of service; or
- Age 48 with age and service equaling 80 or more – “Rule of 80.”

General employees may retire early at age 55 with at least 10 years of service with reduced benefits. The base benefit in the general employee plan is equal to 1.6% multiplied by the final average pay multiplied by years of credited service.

Members employed prior to August 28, 1997, receive cost-of-living adjustments (COLAs) annually based on 80% of the percentage increase in the average consumer price index (CPI) from one year to the next, with a minimum rate of 4% and maximum rate of 5% until the cumulative amount of COLAs equal 65% of the original benefit. Thereafter, the 4% minimum rate is eliminated. Members employed on or after August 28, 1997, and members who have met their COLA cap receive COLAs annually based on 80% of the percentage increase in the average CPI from one year to the next, up to a maximum rate of 5%.

Qualified, inactive-vested members may make a one-time election to receive the present value of their future benefit in a lump-sum payment rather than a monthly benefit at retirement age. To qualify, members must have left state employment on or after October 1, 1984, and prior to September 1, 2002, have less than 10 years of service, not be within five years of retirement eligibility, and meet age requirements. In addition, if members left state employment on or after August 28, 1997, and prior to September 1, 2002, the present value of their benefit must be less than \$10,000.

MSEP 2000

General state employees are fully vested for benefits upon accruing five years of credited service. Under the MSEP 2000, general employees may retire with full benefits upon the earliest of attaining:

- Age 62 with 5 years of service; or
- Age 48 with age and service equaling 80 or more – “Rule of 80.”

General employees may retire early at age 57 with at least five years of service with reduced benefits. The base benefit in the general employee plan is equal to 1.7% multiplied by final average pay multiplied by years of credited service.

Those retiring under the “Rule of 80” receive an additional temporary benefit equivalent to 0.8% multiplied by final average pay multiplied by years of credited service, which is payable until age 62.

COLAs are provided annually based on 80% of the percentage increase in the average CPI from one year to the next, up to a maximum rate of 5%.

MSEP 2011 Tier

On July 19, 2010, legislation was signed into law adding a new tier (MSEP 2011) to the MSEP 2000 defined benefit pension plan. This tier includes all members first employed in a benefit-eligible position on or after January 1, 2011.

Legislation signed into law on July 14, 2017, changed the original vesting requirement of 10 years to five years for actively employed members of the MSEP 2011, effective January 1, 2018.

Under the MSEP 2011, general employees may retire with full benefits upon the earliest of attaining:

- Age 67 with 5 years of service; or
- Age 55 with age and service equaling 90 or more – “Rule of 90.”

General employees may retire early at age 62 with at least five years of service with reduced benefits. The base benefit in the general employee plan is equal to 1.7% multiplied by final average pay multiplied by years of credited service.

Those retiring under “Rule of 90” receive an additional temporary benefit equivalent to 0.8% multiplied by final average pay multiplied by years of credited service, which is payable until age 62.

COLAs are provided annually based on 80% of the percentage increase in the average CPI from one year to the next, up to a maximum rate of 5%.

Judicial Plan

The Judicial Plan is a single-employer, defined benefit public employee retirement plan administered in accordance with Sections 476.445 to 476.690, RSMo. Responsibility for the operation and administration of the Judicial Plan is vested in the MOSERS Board of Trustees. Due to the nature of MOSERS’ reliance on funding from the state of Missouri and the overall control of the plan document by the legislative and executive branches of state government, the Judicial Plan is considered a component unit of the state of Missouri financial reporting entity.

Judges and commissioners of the supreme court or the court of appeals, judges of any circuit court, probate court, magistrate court, court of common pleas, court of criminal corrections, justices of the peace, commissioners or deputy commissioners of the probate division of the circuit court appointed after February 29, 1972, in a first class county having a charter form of government in a city not within a county, commissioners of the juvenile division of the circuit court appointed pursuant to Section 211.023, RSMo, commissioners of the drug court or commissioners of any family court are eligible for membership in the Judicial Plan. The Judicial Plan provides defined benefit pension and survivor benefits. Members are immediately vested.

Per the June 30, 2025, actuarial valuation, membership in the Judicial Plan consisted of the following:

Retirees and beneficiaries currently receiving benefits		639
Active		
Vested	427	
Nonvested	0	427
Inactive		
Vested (not yet receiving benefits)*		33
Total membership		1,099

** Includes 1 member on leave of absence*

Funding of the Judicial Plan on an actuarial basis began on July 1, 1998. Employer contributions are determined through annual actuarial valuations. For the year ended June 30, 2025, the employer contribution rate was 61.34% of covered payroll. The state of Missouri makes the employer contribution to the Judicial Plan. Members of the Judicial Plan (closed plan) do not make employee contributions. Members of the Judicial Plan 2011 tier are required to contribute 4% of covered payroll.

Judicial Plan (closed plan)

Members of the Judicial Plan may retire with full benefits upon the earliest of attaining:

- Age 62 with 12 years of service; or
- Age 60 with 15 years of service; or
- Age 55 with 20 years of service.

Employees may retire early at age 62 with less than 12 years of service, or age 60 with less than 15 years of service with a reduced benefit that is based upon years of service relative to 12 or 15 years.

In the Judicial Plan, the base benefit for members with 12 or more years of service is equivalent to 50% of compensation on the highest court served.

Members first employed prior to August 28, 1997, receive COLAs annually based on 80% of the percentage increase in the average CPI from one year to the next, with a minimum rate of 4% and a maximum rate of 5% until the cumulative amount of COLAs equals 65% of the original benefit. Thereafter, the 4% minimum rate is eliminated. Members first employed on or after August 28, 1997, and members who have met their COLA cap receive COLAs annually based on 80% of the percentage increase in the average CPI from one year to the next, up to a maximum rate of 5%.

Qualified inactive-vested members may make a one-time election to receive the present value of their future benefit in a lump-sum payment rather than a monthly benefit at retirement age. To qualify, they must have left state employment on or after August 28, 1997, and prior to September 1, 2002, have less than 10 years of service, not be within five years of retirement eligibility, and have a benefit present value of less than \$10,000.

Judicial Plan 2011 Tier

On July 19, 2010, an additional tier of the defined benefit Judicial Plan was signed into law. This tier (Judicial Plan 2011) includes all new judicial members first employed as a judge on or after January 1, 2011.

Under the Judicial Plan 2011, members may retire with full benefits upon the earliest of attaining:

- Age 67 with 12 years of service; or
- Age 62 with 20 years of service.

Judicial Plan 2011 members may retire early at age 67 with less than 12 years of service with reduced benefits, or age 62 with less than 20 years of service with a reduced benefit based on years of service.

For a more detailed summary of benefits for members of the Judicial Plan, refer to the *Summary of Plan Provisions* in the *Actuarial Section* of this report.

Administrative Law Judges and Legal Advisors' Plan

On April 26, 2005, Senate Bill 202 was enacted, which terminated the Administrative Law Judges and Legal Advisors' Plan (ALJLAP) for new hires only. Under this legislation, administrative law judges and legal advisors (ALJs) who assume a position after April 26, 2005, and would have otherwise been covered by the ALJLAP will instead participate in the MSEP or the MSEP 2000, depending on when they initially became state employees. For fiscal years 2005 and after, all liabilities and assets of the ALJLAP were transferred and combined with the MSEP. Membership totals for the ALJLAP are included in the MSEP in all relevant sections of this report.

Missouri State Insured Defined Benefit Insurance Plan

The Missouri State Insured Defined Benefit Insurance Plan is administered through and underwritten by The Standard Insurance Company (The Standard), which is a third-party administrator with oversight by MOSERS. It provides basic life insurance in an amount equal to one times an employee's annual salary while actively employed (with a \$15,000 minimum) to eligible members of the MSEP, MSEP 2000, and MSEP 2011 (except employees of the Missouri Department of Conservation and certain state universities), Judicial Plan, Judicial Plan 2011, and certain members of the Public School Retirement System (PSRS).

The plan also provides duty-related death benefits, optional life insurance for active employees and retirees who are eligible for basic coverage, and a long-term disability insurance plan for eligible members. For a more detailed description of insurance benefits, refer to pages 116-117 in the *Actuarial Section* of this report.

Due to the nature of MOSERS' reliance on funding from the state of Missouri and its component employers, and the overall control of the plan document by the legislative and executive branches of state government, the Missouri State Insured Defined Benefit Insurance Plan is considered a component unit of the state of Missouri financial reporting entity and is included in the state's financial reports.

State of Missouri Deferred Compensation Plan (MO Deferred Comp)

MO Deferred Comp is a retirement savings plan for state of Missouri employees, including faculty and staff at 10 state colleges and universities. Money invested in the plan provides income in retirement to supplement the member's defined benefit pension and Social Security benefits. Funds are automatically deducted from the employee's pay and placed in their account. The participant decides how the money will be invested. Employees may also roll over eligible pre-tax distributions from other qualified retirement plans.

The MO Deferred Comp plan is comprised of a 457 deferred compensation plan for employee contributions and a related 401(a) plan for an employer incentive match contribution. MOSERS uses MissionSquare Retirement as an external provider for record keeping for the plans. These plans have separately issued financial statements. The net position of these plans was approximately \$2.6 billion and \$713.3 million as of June 30, 2025, for the 457 and 401(a) plans, respectively.

MOSERS unitizes investments for the purpose of allowing MO Deferred Comp Plan participants the option to invest in the MOSERS investment portfolio (MIP). For financial reporting purposes, investments throughout this ACFR are reported in whole and include 0.03%, or approximately \$2.7 million, of the units invested in the MIP by MO Deferred Comp participants. Effective June 30, 2017, the option to invest in the MIP fund was no longer available to Plan participants. All participants invested in the MIP fund as of that date could continue to defer into it through May 2025, but no rollovers or new elections were permitted. The MIP fund investment option is being terminated as part of the transition to a new record keeper. Existing balances in the MIP will be automatically transferred to a Missouri Target Date Fund on or near July 30, 2025.

Audited financial statements for the State of Missouri Deferred Compensation Plan can be viewed online at www.moderredcomp.org.

Colleges & Universities Retirement Plan (CURP)

The Colleges & Universities Retirement Plan (CURP) is a defined contribution plan administered by MOSERS for education employees (as determined by the university) at nine Missouri state universities. Retirement income from the plan is dependent upon the employee's plan account balance at retirement. The employee's plan account balance is built from mandatory contributions to the plan and the investment returns generated from employee-selected investment options. To be eligible for the CURP, the employee must:

- Meet the definition of "education employee" as defined by their employer, and
- Be employed in this position for the first time on or after July 1, 2002, and
- Not have previous employment in a position covered by another defined benefit pension plan administered by MOSERS, and
- Be employed at a participating regional Missouri university.

After six years of participation in CURP, the employee may transfer to a MOSERS defined benefit pension plan and will immediately become a vested member of MSEP 2011. By transferring to MOSERS, the employee forfeits all rights to future participation in CURP (i.e., they can't go back to CURP). However, the employee will continue to own and control their CURP account. CURP activities are not included within this report.

Note 2 – Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared in accordance with accounting principles generally accepted in the U.S. that apply to governmental accounting on an accrual basis.

Contributions are recognized as revenues when due, pursuant to statutory requirements. Benefits, refunds, and BackDROP payments are recognized when due and payable. Administrative and other expenses are recorded when the corresponding liabilities are incurred.

Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the accompanying financial statements and disclosures. Actual results could differ from those estimates.

Method Used to Value Investments

Investment assets are reported at fair value, in accordance with Standards issued by the Governmental Accounting Standards Board (see Note 3 for discussion of the valuation methodology for investment assets). The *Schedule of Investments and Derivative Instruments Measured at Fair Value* in Note 3 presents the fair value information of the investments as reported on the *Statements of Fiduciary Net Position*.

MOSERS' Participation in Other Post-Employment Benefit (OPEB) Programs

Other Post-Employment Benefit (OPEB) related items, including: net OPEB liability, deferred outflows of resources, deferred inflows of resources, net OPEB expense, fiduciary net assets, and additions to and deductions from fiduciary net assets have been determined on the same basis as they are reported by MCHCP. For this purpose, employer contributions are recognized as revenue when due and payable. Benefits are recognized when due and payable in accordance with the terms of the Plan (see *Note 7 – MCHCP Post-Employment Retiree Health Care OPEB Program*).

Capital & Intangible Assets

The MOSERS building and other capital assets are stated at cost less accumulated depreciation. Intangible assets include software applications and are stated at cost less accumulated amortization. Intangible assets are reported with capital assets in the *Statements of Changes in Fiduciary Net Position*. Capital and intangible assets are depreciated on a straight-line basis over their estimated useful lives. MOSERS evaluates leases and subscription-based information technology arrangements to determine if they should be capitalized as right-to-use assets. Right-to-use assets are depreciated on a straight-line basis over the non-cancellable life of the lease, including only those optional periods for which MOSERS is reasonably certain to renew the subscription.

Adoption of Accounting Standards

MOSERS has adopted Governmental Accounting Standards (GASB) Statement No. 101 *Compensated Absences*. MOSERS records a liability for all annual leave and sick leave is converted to a pension benefit upon retirement. There is no material effect on the financial statements as a result of implementing GASB Statement 101.

Note 3 – Cash and Investments

Cash Deposits with Financial Institutions

MOSERS requires its business bank to collateralize amounts on deposits that exceed the Federal Deposit Insurance Corporation (FDIC) insured amount. The types of collateral security shall be included on a list maintained by the State Treasurer's office in accordance with Section 30.270, RSMo. Securities pledged as collateral are held in agency by a separate bank. As of June 30, 2025, all deposit balances with MOSERS' business bank in excess of FDIC insurance limits were fully collateralized.

Investment Policy

Section 104.440, RSMo allows the Board of Trustees to invest the trust fund assets in accordance with the prudent person rule. In February 2024, the Board voted to adopt a new asset allocation, which includes seven categories: global public equities, global private equities, U.S. treasuries, private real estate, private real assets, alternative beta, and private credit. The Board approved asset allocation eliminates six categories from the previous asset allocation: long treasuries, core bonds, commodities, treasury inflation protected securities (TIPS), public real assets, and hedge funds. The board adopted a two-year transition to implement the new portfolio allocation which is expected to be completed in fiscal year 2026. As such, the portfolio included investments in all thirteen asset classes listed above as of June 30, 2025.

MOSERS' policy, with respect to the allocation of invested assets, is established and amended by a majority vote by the Board of Trustees. The Board's guiding principles with respect to the investment of MOSERS' assets are to maximize total return within prudent risk parameters, and act in the exclusive interest of the members of the System. The Board has developed a policy allocation that is designed to achieve the long-term required return objectives of the System, given certain risk constraints. The current asset allocation reflects a diversified portfolio, which will perform well in a variety of economic conditions and will help reduce the portfolio's overall volatility.

The Board has authorized staff to create and maintain a portfolio that utilizes a modest amount of leverage in order to diversify the risk across the thirteen asset class categories contained in the portfolio. As of the end of fiscal year 2025, the market exposure was limited to 1.35 times capital. The limit may also be stated as 135% of capital. The table below illustrates the fair value, market exposure, and policy exposure of the portfolio by asset class as of June 30, 2025.

Schedule of Internally Managed Leverage

	Fair Value Capital	Percent of Portfolio at Fair Value	Market Exposure	Percent of Portfolio at Market Exposure *	Policy Exposure *
Global Public Equities	\$ 3,351,428,487	35.2%	\$ 3,351,428,715	35.2%	35.0%
Global Private Equities	1,419,786,010	14.9	1,419,786,478	14.9	15.0
Long Treasuries	606,691,185	6.4	1,185,928,437	12.5	12.5
US Treasuries	6,306,493	0.1	945,256,253	9.9	10.0
Core Bonds	471,985,105	5.0	471,985,100	5.0	5.0
Commodities	87,884,602	0.9	234,257,754	2.5	2.5
TIPS	519,763,434	5.5	1,184,922,954	12.5	12.5
Private Real Estate	439,032,015	4.6	439,032,015	4.6	5.0
Private Real Assets	236,010,294	2.5	236,009,995	2.5	2.5
Public Real Assets	230,350,476	2.4	230,350,476	2.4	2.5
Hedge Funds	239,558,876	2.5	239,558,876	2.5	2.5
Alt Beta	1,197,850,645	12.6	1,197,850,645	12.6	12.5
Private Credit	707,576,017	7.4	706,831,329	7.4	7.5
Total portfolio	\$ 9,514,223,639	100.0%	\$ 11,843,199,027	124.4%	125.0%

* Percentage total may not equal sum due to rounding.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate rates of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future rates of return by the target asset allocation percentage and by adjusting for expected inflation, volatility, and correlations. Best estimates of the real rates of return for each major asset class included in MOSERS' target asset allocation adopted in February 2024 are summarized in the table below. The Board adopted a transition period for the asset allocation to be implemented over a two-year period ending June 30, 2026.

Target Asset Allocation

Asset Class	Policy Allocation	Long-Term Expected Nominal Return*	Long-Term Expected Real Return	Long-Term Expected Nominal Return
Global public equities	40.0%	8.2%	5.7%	3.3%
Global private equities	15.0	10.9	8.4	1.6
US treasuries	20.0	4.8	2.3	1.0
Private real estate	5.0	7.5	5.0	0.4
Private real assets	5.0	9.7	7.2	0.5
Alternative beta	15.0	5.6	3.1	0.8
Private credit	10.0	8.4	5.9	0.8
Cash and cash equivalents**	(10.0)	4.1	1.6	(0.4)
	100.0%			8.0%
Correlation/volatility adjustment				(0.6)%
Long-term expected net nominal return				7.4 %
Less: investment inflation assumption				(2.5)%
Long-term expected geometric net real return				4.9 %

* Long-term expected arithmetic returns of the asset classes at the time of the asset allocation study for the portfolio.

** Cash and cash equivalents policy allocation amounts are negative due to use of leverage.

Money-Weighted Rate of Return

The annual money-weighted rate of return on pension plan investments, net of pension plan investment expense, was 9.68% for the year ended June 30, 2025. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for changing amounts actually invested.

Fair Value Measurement

MOSERS categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset and gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

- **Level 1** – Unadjusted quoted prices for identical instruments in active markets.
- **Level 2** – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable.
- **Level 3** – Valuations derived from valuation techniques in which significant inputs are unobservable.

Investments that are measured at fair value using the net asset value (NAV) per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

The categorization of investments within the hierarchy is based upon the pricing transparency of the instrument and should not be perceived as the particular investment's risk.

In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. MOSERS' assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability. The tables on pages 35-36 show the fair value leveling of the investments and additional information for investments valued at net asset value.

Debt, equities, and investment derivatives classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities.

Debt securities classified in Level 2 have non-proprietary information that was readily available to market participants from multiple independent sources, which are known to be actively involved in the market. Pricing inputs may include market quotations, yields, maturities, call features, and ratings. Derivative securities classified in Level 2 are contracts whose values are derived daily from associated traded securities.

Fair values for the private real estate investment funds are based on appraisals. Fair values of the limited partnership investments are based on valuations of the underlying companies of the limited partnerships as reported by the general partner. Certain limited partnerships reflect values and related performance on a quarter lag basis due to the nature of those investments and the time it takes to value them. Fair value of the commingled funds is determined based on the underlying asset values. The remaining assets are primarily valued by the System's master custodian using the last trade price information supplied by various pricing data vendors.

Investments and Derivative Instruments Measured at Fair Value

		Fair Value Measurement Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
June 30, 2025	Total

Total investments measured at the net asset value (NAV)	<u>\$ 5,716,209,659</u>	<u>\$ 1,002,514,637</u>		

- **Commingled fund - investment grade fixed income funds** – Consisting of one fund, this strategy is commingled in nature and is valued at the NAV held at the end of the period based upon the fair value of the underlying investments.
- **Commingled fund - short term investment fund** – One short-term investment fund is considered to be commingled in nature and is valued at the NAV held at the end of the period based upon the fair value of the underlying investments.
- **Equity market neutral hedge fund** – Consisting of one fund, this strategy invests in both long and short U.S. and global equity securities, with the goal of having little to no net market exposure. This investment is valued at the NAV, is redeemable semi-annually, and is not subject to lock-up restrictions.
- **Fund-of-funds** – Consisting of five funds, these funds seek to provide diversification by holding a number of funds within a single fund structure. These investments are valued at the NAV, are redeemable monthly or quarterly, and are subject to liquidation of the underlying funds.
- **Macro hedge fund** - Consisting of one fund, this strategy invests in equities, bonds, FX and commodities forecasting and trading on central bank policy in emerging markets. This investment is valued at the NAV, is redeemable quarterly, and is not subject to lock-up restrictions.
- **Merger arbitrage hedge fund** – Consisting of one fund, this strategy invests in the common stock of companies that are involved in publicly announced mergers and seeks to generate attractive returns while dampening volatility. This investment is valued at the NAV, is redeemable monthly, and is not subject to lock-up restrictions.
- **Multi-strategy hedge funds** – Consisting of six funds, these funds aim to pursue varying strategies in order to diversify risks and reduce volatility. These investments are valued at the NAV, are redeemable monthly, quarterly or semi-annually, but are subject to lock-up restrictions.
- **Quantitative hedge funds** – Consisting of two funds, this strategy attempts to achieve uncorrelated returns using advanced statistical methods to select securities across liquid public markets and systematic volatility trading. These investments are valued at the NAV, are redeemable monthly, and are not subject to lock-up restrictions.
- **Relative value volatility hedge funds** – Consisting of one fund, this strategy invests liquid volatility-related instruments in listed futures and options primarily in US markets, with the goal of having little to no net market exposure. This investment is valued at the NAV, is redeemable monthly, and is not subject to lock-up restrictions.

- **Securitized credit hedge fund** – Consisting of two funds, this strategy invests in investment grade synthetic securitizations primarily in the US and Europe. This investment is valued at the NAV. The fund liquidation is determined by the funds governing documents which will lead to investor's capital being returned.
- **Pending liquidated hedge funds** – Consisting of five funds which have been fully redeemed as of June 30, 2025, for which MOSERS is awaiting final distribution of the proceeds, which will be received upon sale of the underlying investments or upon completion of the audit of the firm's annual financial statements.
- **Private markets funds** – The MOSERS private markets portfolio consists of 56 funds with exposure to buyout funds, direct lending, distressed funds, infrastructure, energy, natural resources, secondary, special situations, and U.S. commercial real estate. The fair values of the majority of these funds have been determined using net assets valued one quarter in arrears plus current quarter cash flows. Most of these funds are not eligible for redemption. Distributions are received as underlying investments in the funds are liquidated, which on average, can occur over the span of five to 10 years.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to MOSERS. As of June 30, 2025, MOSERS' fixed income assets that are not U.S. government guaranteed represented 30.7% of fixed income securities. In preparing this report, credit risk associated with all fixed income holdings, including collateral for repurchase agreements, has been included. The tables on the following page summarize MOSERS' fixed income security exposure levels and credit qualities.

As a matter of practice, there are no overarching limitations for credit risk exposures within the overall fixed income portfolio. Each individual portfolio within fixed income is managed in accordance with operational guidelines that are specific as to permissible credit quality ranges, exposure levels within individual quality tiers, and average credit quality.

Credit risk for derivative instruments held by the System results from counterparty risk assumed by MOSERS. This is essentially the risk that the counterparty to a MOSERS transaction will be unable to meet its obligation. Information regarding MOSERS' credit risk related to derivatives is found under the derivatives disclosures beginning on page 41 of the notes.

The commingled fund - investment grade fixed income funds are invested and reinvested primarily in a portfolio of U.S. dollar denominated investment grade securitized debt obligations, with the objective of approximating the total rate of return of the market for debt securities as defined by the *Bloomberg U.S. Securitized Index*. The average rating for the underlying securities within this fund is AA+.

Average Credit Quality and Exposure Levels of Nongovernment Guaranteed Securities

Fixed Income Security Type	Fair Value June 30, 2025	Percent of all Fixed Income Assets	Weighted Average Credit Quality	Ratings Dispersion Requiring Further Disclosure
U.S. government agencies	\$ 150,078,769	2.9%	AA	See below

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. This risk is managed by using the effective duration or option adjusted methodology. It is widely used in the management of fixed income assets by quantifying the risk of interest rate changes. This methodology takes into account optionality on bonds and scales the risk of price changes on bonds depending upon the degree of change in rates and the slope of the yield curve. Within the investment policy, operational guidelines specify the degree of interest rate risk taken within the System's fixed income portfolios, with the exception of some portfolios in which credit risk is the predominant factor and is also controlled by specific guidelines. MOSERS believes that the reporting of effective duration found in the tables below quantifies to the fullest extent possible the interest rate risk of the System's fixed income securities.

MOSERS invests in mortgage-backed securities, which have embedded within them the option of being repaid, whereby the borrower has the option to keep the debt outstanding in rising interest rate environments or repay the debt in declining interest rate environments, a factor that advantages the issuer. This risk is incorporated within the effective duration calculation used in the interest rate risk analysis.

Effective Duration of Fixed Income Assets by Security Type

Fixed Income Security Type	Fair Value June 30, 2025	Percent of all Fixed Income Assets	Weighted Average Effective Duration (Years)	Interest Rate Risk Requiring Further Disclosure
U.S. treasuries	\$ 2,626,021,610	51.6%	7.8	See below
U.S. government agencies	150,078,769	2.9	0.2	None

Effective Duration Analysis of U.S. Treasuries

Maturity	Fair Value June 30, 2025	Average Effective Duration of the Security Type (Years)	Contribution to Effective Duration (Years)
Less than 1 year to maturity	\$ 297,572,717	0.3	0.0
1- to 10-year maturities	1,254,147,147	4.4	2.1
Long coupon treasuries	1,074,301,746	14.0	5.7
	<u>\$ 2,626,021,610</u>		<u>7.8</u>

Repurchase Agreements

Tri-party repurchase agreements (repos) are a secured loan by a financial institution with the collateral held at a custodian bank. In a tri-party repo transaction, MOSERS transfers cash to a financial institution and the financial institution transfers securities to the custodian bank. Simultaneously, the financial institution promises to repay the loan in the future plus interest in exchange for the return of the securities.

Reverse repurchase agreements (reverse repos) are used to convert securities into cash. In a reverse repo transaction, MOSERS transfers securities that are owned in the portfolio to a financial institution and the financial institution transfers cash to MOSERS. Simultaneously, MOSERS promises to repay the loan in the future plus interest in exchange for the return of the securities.

Typical collateral for repos and reverse repos include treasury securities, agency securities, mortgage-backed securities, investment grade corporate bonds, commercial paper, and common stock. Repos and reverse repos are typically done for an overnight term; however, they can be done for a longer term. MOSERS enters into repo transactions to earn interest on short-term funds and enters into reverse repos to finance the purchase of additional securities.

The yield earned by MOSERS on the repo transactions ranged from 4.24% to 5.45% with maturities of one to five days.

The yield earned by the counterparties on the reverse repo transactions ranged from 2.73% to 5.48% and had maturities of one month to one year. The maturities of the investments made with reverse repo proceeds generally have maturities of one to 30 years.

In repo transactions, MOSERS may have credit risk if the counterparty fails to repay the loan and the value of the securities held as collateral falls below the loan balance. To minimize this risk, MOSERS requires the financial institution to send collateral with a fair value greater than the value of the loan and revalues the collateral on a daily basis. As of fiscal year end, MOSERS held approximately \$39.0 million of counterparty collateral in excess of the repo balance.

In a reverse repo transaction, MOSERS may be subject to credit risk if the counterparty fails to return the securities and the value of the securities held as collateral rise above the loan balance. To minimize this risk, MOSERS sends the minimum amount of collateral required by the financial institution and requires the financial institution to revalue the collateral and return excess collateral on a daily basis. Counterparties held approximately \$7.0 million of MOSERS' collateral in excess of the reverse repo balance as of the end of the fiscal year.

The tables below summarize MOSERS' exposure for repo and reverse repo transactions.

Tri-Party Repurchase Agreements by Collateral Type

Collateral Type	Fair Value of Collateral June 30, 2025	Fair Value Including Accrued Interest of Repurchase Agreements June 30, 2025	Excess (Deficit) Collateral	Percent Over Collateralized
U.S. treasuries	\$ 918,031,612	\$ 900,000,000	\$ 18,031,612	
U.S. government agencies	311,100,045	305,000,000	6,100,045	
Common stock	165,013,694	150,000,000	15,013,694

Foreign Currency Risk

Foreign currency risk is the risk that changes to foreign exchange rates will adversely impact the fair value of non-U.S. Dollar denominated assets. The following table summarizes MOSERS' exposure to foreign currencies for all assets that are held in custody at the System's custodial bank. MOSERS has exposure to foreign currencies in other areas of the portfolio, such as commingled international funds, hedge funds, and private partnerships, which are held in the custody of other banks acting as administrators for the funds. MOSERS' exposure to foreign currency risk in U.S. dollars, as of June 30, 2025, is highlighted in the table below.

Currency Exposures by Asset Class

Currency	Cash & Cash Equivalents	Equities	Fixed Income	Total
Australian Dollar	\$ 7,893,493	\$ 0	\$ 0	\$ 7,893,493
Canadian Dollar	5,235,634	0	0	5,235,634
Hong Kong Dollar	(7,125,229)	0	0	(7,125,229)
Israeli Shekel	1	0	0	1
Japanese Yen	705,343	668,737	(28,661)	1,345,419
South African Rand	(913,385)	0	0	(913,385)
South Korean Won	3,274,139	(2,198,378)	0	1,075,761
Euro	6,443,671	(401,806)	411,904	6,453,769
United Kingdom Pound Sterling	1,332,214	0	0	1,332,214
	<u>\$ 16,845,881</u>	<u>\$ (1,931,447)</u>	<u>\$ 383,243</u>	<u>\$ 15,297,677</u>

Derivatives

Derivative instruments are financial contracts whose values depend on the values of one or more underlying assets, reference rates, or financial indexes. They include futures contracts, swap contracts, options contracts, and forward foreign currency exchange. The following tables summarize the various contracts in the portfolio as of June 30, 2025.

Futures Contracts

Futures Contract	Notional Value	Exposure
Currency futures	\$ 133,523,899	\$ 1,666,458
Fixed income futures	(190,463,586)	133,047
Equity index futures	39,800,957	(1,236,252)
Commodity futures	(37,411,217)	(676,473)
Total	<u>\$ (54,549,947)</u>	<u>\$ (113,220)</u>

Swap Contracts

Counterparty Credit Rating	Notional Value	Exposure
Total return swaps - equity		
A+	\$ 3,460,429,120	\$ 150,707,283
AA-	252,030,057	0
Total	\$ 3,712,459,177	\$ 150,707,283
Total return swaps - fixed income		
A+	\$ 926,784,117	\$ 3,763,018
A	244,264,274	2,911,644
AA-	149,321,602	138,533
Total	\$ 1,320,369,993	\$ 6,813,195
Total return swaps - commodities		
A+	\$ 99,306,458	\$ 0
AA-	134,951,296	0
Total	\$ 234,257,754	\$ 0

While the Board has no formal policy specific to derivatives, the MOSERS investment implementation program, through its external managers, holds investments in futures contracts and swap contracts. MOSERS enters into these certain derivative instruments as investments primarily to enhance the performance and reduce the volatility of its portfolio. It enters swaps and futures contracts to gain or hedge exposure to certain markets and to manage interest rate risk.

The notional values associated with these derivative instruments are generally not recorded in the financial statements; however, the fair values of these instruments are recorded in the *Statements of Fiduciary Net Position* and the total changes in fair value for the year are included as net appreciation in fair value of investments in the *Statements of Changes in Fiduciary Net Position*. For the year ended June 30, 2025, the change in fair value in the swap contracts resulted in a gain of \$318 million of investment income. The change in fair value in the futures contracts resulted in a loss of \$13.8 million of investment income. Foreign currency risk associated with derivative activities is included in the *Currency Exposures by Asset Class* table. MOSERS does not anticipate additional significant market risk from the derivative arrangements.

MOSERS could be exposed to risk if the counterparties to the contracts are unable to meet the terms of the contracts. MOSERS' investment managers seek to control this risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring procedures. MOSERS anticipates that the counterparties will be able to satisfy their obligations under the contracts. Investments in limited partnerships and commingled funds may include derivatives that are not shown in the derivative totals.

Securities Lending Program

The Board of Trustees' *Investment Policy Statement* permits the pension trust funds to participate in a securities lending program. Fixed income, international equity, and domestic equity securities of the pension trust funds can be loaned to participating brokers who provide collateral in the form of cash, U.S. Treasury or government agency securities, or letters of credit issued by approved banks. Collateral must be provided in the amount of 102% of fair value for domestic loans and 105% of fair value for international loans. MOSERS does not have the authority to pledge or sell collateral securities without borrower default.

There was no securities lending activity in fiscal year 2025.

Note 4 – Capital Assets

Office building, furniture, fixtures, equipment, and software costing \$10,000 or more are capitalized. Capital assets are valued at cost and reported net of accumulated depreciation. Improvements, which increase the useful life of the property, are also capitalized. The cost of internally developed software incurred during the application development state, including staff payroll costs, are capitalized in accordance with GASB Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*. Maintenance and repairs are charged to expense as incurred. Depreciation is computed using the straight-line method over the estimated useful life of the related assets according to the following guidelines:

- 5 years for furniture, fixtures, and equipment
- 40 years for building
- 30 years for pension administration system
- 5 years for all other software

Schedules of the capital asset account balances for the year ended June 30, 2025, are as follows:

Capital Assets

	Right-to-Use Assets	Pension Admin. System and Other Software	Building and Building Improvements *	Furniture, Fixtures and Equipment	Total Capital Assets
Capital assets					
Balances June 30, 2024	\$ 1,754,340	\$ 14,104,275	\$ 4,497,089	\$ 2,167,815	\$ 22,523,519

Accumulated amortization			
Balances June 30, 2024	220,663	648,878	869,541
Depreciation expense	95,619	273,408	369,027
Deletions	0	0	0
Accumulated amortization June 30, 2025	316,282	922,286	1,238,568
Net right-to-use assets June 30, 2025	\$ 253,048	\$ 553,742	\$ 806,790

Right-to-Use Assets

Right-to-use assets consist of leased office space and subscription-based software. The intangible right-to-use assets and related liabilities are recorded under GASB Statement No. 87, *Leases*, and GASB Statement No. 96, *Subscription-Based Information Technology Arrangements*. The capitalized value of right-to-use assets and lease liabilities has been calculated based on the future lease payments, discounted to present value. The difference between the liability booked to record the present value of these future payment obligations, and the actual lease payments, is reported as interest expense.

The recording of these liabilities resulted in a future minimum lease commitment, as follows:

Schedule of Minimum Lease Commitments

Year Ended June 30	Building			Software		
	Principal	Imputed Interest	Total	Principal	Imputed Interest	Total
2026	\$ 92,614	\$ 8,451	\$ 101,065	\$ 261,297	\$ 20,521	\$ 281,818
2027	99,476	4,622	104,098	98,492	9,925	108,417
2028	60,958	815	61,773	107,719	5,814	113,533
2029	0	0	0	86,234	1,444	87,678
Total commitments	\$ 253,048	\$ 13,888	\$ 266,936	\$ 553,742	\$ 37,704	\$ 591,446

The changes in the lease liability amounts are reported in the following table:

Schedule of Changes in Lease Liability Amount

	Right-to-Use Assets Buildings	Right-to-Use Assets Software	Total Right-to-Use Assets
Balances June 30, 2024	\$ 57,649	\$ 827,150	\$ 884,799
Increases to liability	291,018	0	291,018
Decreases from liability	(95,619)	(273,408)	(369,027)
Net capital assets June 30, 2025	\$ 253,048	\$ 553,742	\$ 806,790

Note 5 – Employers’ Net Pension Liability

The components of net pension liability as of June 30, 2025, are in the *Schedule of Employers’ Net Pension Liability* below.

Schedule of Employers’ Net Pension Liability

	MSEP	Judicial Plan
Total pension liability	\$ 17,393,412,163	\$ 697,530,450
MOSERS’ fiduciary net position	9,354,041,911	211,176,545
Employers’ net pension liability	\$ 8,039,370,252	\$ 486,353,905
Plan net position as a percentage of the total pension liability	53.78%	30.27%
Covered payroll	\$ 2,616,403,802	\$ 72,765,888
Employers’ net pension liability as a percentage of covered payroll	307.27%	668.38%

An actuarial valuation of an ongoing plan involves estimates of the reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and future salary increases. Amounts determined regarding the net pension liability are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The *Schedule of Changes in Employers’ Net Pension Liability* presents multi-year trend information about whether the plan fiduciary net positions are increasing or decreasing over time relative to the total pension liability. These schedules are presented in the *Required Supplementary Information*. The total pension liability as of June 30, 2025, is \$17,393,412,163 for the MSEP and \$697,530,450 for the Judicial Plan based on an actuarial valuation performed as of June 30, 2025, and a measurement date of June 30, 2025, using generally accepted actuarial procedures.

Actuarial Assumptions Used to Determine Net Pension Liability

An actuarial experience study covering the five-year period ended June 30, 2020, was performed in 2021. A summary of the assumptions used to calculate the net pension liability is contained in the table below. The next experience study is scheduled for 2026.

Summary of Actuarial Assumptions for the MSEP & the Judicial Plan Used to Determine Net Pension Liability

Valuation date	June 30, 2025
Actuarial cost method	Entry age normal
Asset valuation method	Fair value
Investment rate of return, net of investment expense	6.95%
Projected salary increases	2.5 – 10.00% (MSEP) 3.00% (Judicial Plan)
Rate of payroll growth	2.25%
COLAs	4% or 1.80% *
Price inflation	2.25%

* 4.00% compounded annually, when a minimum COLA of 4.00% is in effect. 1.80% compounded annually, when no minimum COLA is in effect (80% of price inflation).

Mortality Rates - MSEP

Pre-retirement mortality rates were based on the Pub-2010 General Members Below Median Employee mortality table, set back two years for males and set forward one year for females. Mortality was projected generationally from 2010 to 2020 using Scale MP-2020 and 75% of Scale MP-2020 for years after 2020.

Post-retirement mortality rates for retirees were based on the Pub-2010 General Members Below Median Healthy Retiree mortality table, scaled by 104%, set back two years for males and set forward one year for females. Mortality projected generationally from 2010 to 2020 using Scale MP-2020 and 75% of Scale MP-2020 for years after 2020.

Post-retirement mortality rates for beneficiaries were based on the Pub-2010 General Members Below Median Contingent Survivor mortality table, set back two years for males and set forward one year for females. Mortality was projected generationally from 2010 to 2020 using Scale MP-2020 and 75% of Scale MP-2020 for years after 2020.

Disabled mortality rates were based on the Pub-2010 Non-Safety Disabled Retiree mortality table, without mortality projection.

Mortality Rates - Judicial Plan

Pre-retirement mortality rates were based on the Pub-2010 General Members Median Employee mortality table.

Mortality was projected generationally from 2010 to 2020 using Scale MP-2020 and 75% of Scale MP-2020 for years after 2020.

Post-retirement mortality rates for retirees were based on the Pub-2010 General Members Median Healthy Retiree mortality table. Mortality was projected generationally from 2010 to 2020 using Scale MP-2020 and 75% of Scale MP-2020 for years after 2020.

Post-retirement mortality rates for beneficiaries were based on the Pub-2010 General Members Median Contingent Survivor mortality table. Mortality was projected generationally from 2010 to 2020 using Scale MP-2020 and 75% of Scale MP-2020 for years after 2020.

Discount Rate

The discount rate used to measure the total pension liability was 6.95%, net of investment expenses. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made using the actuarially determined rates. Based on those assumptions, MOSERS' fiduciary net position was projected to be available to make all the projected future benefit payments of the current plan members. As a result, the long-term expected rate of return on pension plan investments, net of investment expense of 6.95%, was applied to all periods of projected benefit payments to determine the total pension liability.

The table below presents the net pension liability of the plans, as of June 30, 2025, calculated using the discount rate of 6.95%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1% lower (5.95%) or 1% higher (7.95%) than the current rate.

Sensitivity of Net Pension Liability to Changes in the Discount Rate

Employers' Net Pension Liability	1% Decrease 5.95%	Current Discount Rate 6.95%	1% Increase 7.95%
MSEP	\$ 10,045,955,629	\$ 8,039,370,252	\$ 6,363,381,053
Judicial Plan	\$ 553,698,938	\$ 486,353,905	\$ 428,517,346

The funding status of the plans and *Employer Schedule of Funding Progress* can be found in the *Actuarial Section* on page 98.

Note 6 – Retiree Life Insurance and Long-Term Disability Insurance Programs

In addition to the defined benefit pension provided through MOSERS, the state of Missouri also funds, either partially or in its entirety, retiree life insurance, and long-term disability insurance programs for eligible members. These insurance programs are underwritten by The Standard. MOSERS collects premiums for participants of these programs and remits them to the The Standard on behalf of the state of Missouri.

Retiree Life Insurance

Members who retire on or after October 1, 1985, are eligible for \$5,000 of state-sponsored basic life insurance coverage if they retire directly from active employment. As of June 30, 2025, 31,288 retirees were participating in the program. This insured defined benefit coverage is financed on a percentage of payroll (.115%) and is purchased as a group policy through The Standard. The cost for the year ended June 30, 2025, was \$2,594,316. Premiums are contributed entirely by the state and its component employers as provided by Section 104.515, RSMo.

Retirees of the Department of Labor and Industrial Relations (DOLIR) who retired prior to January 1, 1996, are eligible for state-sponsored insured defined benefit insurance coverage in the same amount of coverage they were receiving through the DOLIR. As of June 30, 2025, 47 retirees were participating in the program. The coverage for this closed group is purchased as a group policy at a current cost of \$2.07 per thousand dollars of coverage, per month, per eligible participant (\$6,371 for the year ended June 30, 2025). Premiums are paid entirely by the DOLIR as provided by Section 288.225, RSMo. Retirees of the DOLIR who retired on or after January 1, 1996, are eligible for \$5,000 of state-sponsored life insurance coverage if they retire directly from active employment. They are included in the group described in the preceding paragraph.

Long-Term Disability Insurance (LTD)

MOSERS provides LTD coverage for eligible members and generally includes those active members of MOSERS' retirement plans who do not have other disability coverage and are not yet eligible to receive normal (unreduced) retirement benefits.

There were 36,623 members covered under the program as of June 30, 2025. This insured defined benefit coverage is financed on a percentage of covered payroll (0.0445%). Purchased as a group policy, LTD is administered by The Standard. The cost for the year ended June 30, 2025, was \$9,221,306. Premiums are contributed by the state and its component employers, as provided for by Section 104.515, RSMo.

Note 7 – MCHCP Post-Employment Retiree Health Care OPEB Program

MOSERS participates as an employer in a cost-sharing, multiple-employer, defined benefit, other post-employment benefits plan, the State Retiree Welfare Benefit Trust (SRWBT), operated by Missouri Consolidated Health Care Plan (MCHCP). Employees may participate at retirement if eligible to receive a monthly retirement benefit from MOSERS. The terms and conditions governing post-employment benefits are vested with the MCHCP Board of Trustees within the authority granted under Chapter 103, Sections 103.003 through 103.178, RSMo. The SRWBT does not issue a separate stand-alone financial report. Financial activity of the SRWBT is included in the *MCHCP Annual Comprehensive Financial Report* as a fiduciary fund and is intended to present only the financial position of the activities attributable to the SRWBT. Additionally, MCHCP is considered a component unit of the state of Missouri reporting entity and is included in the state's financial report.

The Plan's financial statements are available on the MCHCP website at www.mchcp.org.

Benefits

The SRWBT was established and organized on June 27, 2008, pursuant to Sections 103.003 through 103.178, RSMo, to provide health and welfare benefits for the exclusive benefit of current and future retired employees of the state and their dependents who meet eligibility requirements, except for those retired members covered by other OPEB plans of the state. The three medical plans from MCHCP offer the same basic coverage such as preventative care and freedom to choose care from a nationwide network of primary care providers, specialists, pharmacies, and hospitals, usually at a lower negotiated group discount and the same covered benefits for both medical and pharmacy. Benefits are the same in all three plans; other aspects differ such as premium, deductible, and out-of-pocket costs. Retiree benefits are the same as for active employees until they are Medicare eligible.

Contributions

Contributions are established and may be amended by the MCHCP Board of Trustees with the authority granted under Chapter 103, Sections 103.003 through 103.178, RSMo. For the fiscal year ended June 30, 2024, employers were required to contribute, on average, 3.59% of active employee covered payroll to fund current fiscal year cost of retiree plan benefits. Employees do not contribute to this plan.

OPEB Liabilities, OPEB Expense, Deferred Outflows of Resources, and Deferred Inflows of Resources

At June 30, 2025, MOSERS reported a liability of \$6,086,710 for its proportionate share of the net OPEB liability. The net OPEB liability was measured as of June 30, 2024, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of that date. MOSERS' proportion of the net OPEB liability was based on a projection of its long-term share of contributions to the OPEB plan relative to the projected contributions of all participating entities, actuarially determined. At June 30, 2024, MOSERS' proportionate share was 0.3852%. For the year ended June 30, 2025, MOSERS recognized a net increase in administrative costs of \$226,819 related to OPEB expense. As of June 30, 2025, MOSERS reported deferred outflows of resources and deferred inflows of resources as follows:

Deferred Outflows/Inflows of Resources Related to Post-Employment Retiree Health Care

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 209,224	\$ 28,380
Changes of assumptions	335,843	1,380,598
Net difference between projected and actual earnings on plan investments	8,160	0
Changes in proportion and differences between MOSERS' contributions and proportionate share of contributions	345,142	381,709
MOSERS' contributions subsequent to the measurement date	295,151	0
	<u>\$ 1,193,520</u>	<u>\$ 1,790,687</u>

The \$295,151 currently reported as deferred outflows of resources related to OPEB resulting from MOSERS' contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability in the year ended June 30, 2026. Other amounts reported as deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

Deferred Outflows/Inflows of Resources Related to Post-Employment Retiree Health Care to be Recognized in Future Years

Year Ending June 30

2026	\$	221,726
2027		207,241
2028		228,287
2029		177,613
2030		53,876
Thereafter		3,575
Total	\$	892,318

Actuarial Assumptions

The collective total OPEB liability for the June 30, 2024, measurement date was determined by an actuarial valuation as of July 1, 2024. This actuarial valuation used the following actuarial assumptions:

Summary of SRWBT's Actuarial Assumptions for Post-Employment Retiree Health Care

Valuation year	July 1, 2023 - June 30, 2024
Actuarial cost method	Entry age normal, level percentage of payroll
Asset valuation method	Fair value
Discount rate	5.50%
Projected payroll growth rate	4.0%
Inflation rate	3.0%
Health care cost trend rate (medical & prescription drugs combined)	
Non-Medicare	6.34% *
* (6.34% in fiscal year 2025, 6.78% in fiscal year 2026, 6.56% in fiscal year 2027, 6.34% in fiscal year 2028, 6.12% in fiscal year 2029, 5.90% in fiscal year 2030, 5.77% in fiscal year 2031, 5.72% in fiscal year 2032, 5.62% in fiscal year 2033, 5.46% in fiscal year 2034, 5.30% in fiscal year 2035, 5.13% in fiscal year 2036, 4.95% in fiscal year 2037, 4.77% in fiscal year 2038, 4.59% in fiscal year 2039, and 4.50% in fiscal year 2040 and later.)	
Medicare	7.75% **
** (7.75% in fiscal year 2025, 9.39% in fiscal year 2026, 12.87% in fiscal year 2027, 12.73% in fiscal year 2028, 9.56% in fiscal year 2029, 9.14% in fiscal year 2030, 8.34% in fiscal year 2031, 7.67% in fiscal year 2032, 7.35% in fiscal year 2033, 6.92% in fiscal year 2034, 6.49% in fiscal year 2035, 6.05% in fiscal year 2036, 5.61% in fiscal year 2037, 5.16% in fiscal year 2038, 4.72% in fiscal year 2039, and 4.50% in fiscal year 2040 and later.)	

Mortality: *Pre-Retirement*: Pri-2012 Employee Amount-weighted Mortality Table projected generationally using MP-2021.

Annuitant: Pri-2012 Retiree Amount-weighted Mortality Table projected generationally using MP-2021.

The last experience study was conducted in 2020. Termination rates, retirement rates, participation, and dependent coverage assumptions were updated as a result of the experience study. Per capita claims costs, administrative expenses, and retiree contributions were updated based on analysis of 2024 rates.

Change in Assumptions and Methods Since Prior Valuation

Per capita health costs, administrative expenses, and retiree contributions were updated to reflect current experience. Trend assumptions were revised to reflect future expectations based on the rates guaranteed for the Medicare Advantage medical plan and the estimated impact of the Inflation Reduction Act of 2022 (IRA) on Medicare Prescription Drug plans. There were no changes in benefits.

Sensitivity to Changes in the Health Care Cost Trend Rates

The following table presents MOSERS' net OPEB liability, calculated using the current trend rate, as well as what the net OPEB liability would be if it were calculated using a trend rate that is one percent lower or one percent higher:

Sensitivity of the Net SRWBT OPEB Liability to Changes in Health Care Cost Trend Rates

	1% Decrease in Trend Rates	Current Trend Rates	1% Increase in Trend Rates
Net OPEB liability	\$ 5,166,349	\$ 6,086,710	\$ 7,241,866

Discount Rate

A discount rate of 5.5% was used to measure the total OPEB liabilities. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rates and the contributions will be made at statutorily required rates, actuarially determined. This discount rate was determined as the best estimate of the expected return on plan assets as of the measurement date.

Sensitivity to Changes in the SRWBT Discount Rate

The following table presents MOSERS' net OPEB liability, calculated using a discount rate of 5.5%, as well as what the net OPEB liability would be if it were calculated using a discount rate that is one percent lower or one percent higher:

Sensitivity of the Net SRWBT OPEB Liability to Changes in Discount Rate

	1% Decrease in Discount Rate (4.5%)	Current Discount Rate (5.5%)	1% Increase in Discount Rate (6.5%)
Net OPEB liability	\$ 7,178,916	\$ 6,086,710	\$ 5,207,487

Long-Term Expected Rate of Return

The target allocation and expected real rate of return for each major asset class are listed below:

SRWBT Long-Term Expected Rate of Return

Asset Class	Target Allocation	Expected Real Rate of Return
Domestic large cap stocks	20.0%	7.5%
Domestic mid cap stocks	5.0	8.4
Domestic small cap stocks	5.0	9.3
Global equity	6.0	7.9
Domestic fixed income	64.0	4.4

Note 8 – Commitments

As of June 30, 2025, MOSERS has \$1.0 billion in unfunded commitments in the private markets funds.

Note 9 – Contingencies

There were no contingencies which would have a material impact on the financial statements as of June 30, 2025.

Note 10 – Risk Management

MOSERS is exposed to various risks of loss related to natural disasters, errors and omissions, loss of assets, torts, etc. MOSERS has chosen to cover such losses through the purchase of commercial insurance to help mitigate some of the exposure to those risks. In the previous three years, MOSERS has not experienced any losses that exceeded our insurance coverage limits.

Note 11 – Subsequent Events

The MIP fund investment option that enabled MO Deferred Comp participants to invest in the MOSERS investment portfolio was terminated in July 2025 as part of the transition to a new record keeper. As of June 30, 2025, MOSERS had a liability of \$2.7 million related to this program. These existing balances in the MIP were transferred to other investment options available to DC participants in July 2025, thereby reducing the MIP liability to zero.

* Since the percent of payroll contributions rate was applied to the pension payroll during the fiscal year, the actuarially determined contribution is equal to the actual contribution. In fiscal years 2016 and 2017, excess contributions were made because the actuarially determined contribution rate fell below the Board-established minimum contribution rate. During fiscal year 2023, MOSERS received a one-time contribution of \$500 million from the state of Missouri. The minimum contribution rate was increased to 28.75% in fiscal year 2025, 30.25% in fiscal year 2026, and 32% in fiscal year 2027.

** For fiscal years 2016 and prior, covered payroll totals from the valuation report were used, which includes actual covered payroll from July through May with estimated amounts for June. For fiscal years 2017 and forward, covered payroll totals used are actual covered payroll from July through June, as reported in the GASB 67 report.

*** Beginning in fiscal year 2023, the employers were given the option to prepay contributions at certain times during the year and receive an actuarially determined present value discount based on MOSERS' investment return assumption.

See accompanying Notes to the Schedules of Required Supplementary Information - Pension Trust Funds.

Notes to the Schedules of Required Supplementary Information - Pension Trust Funds

Actuarial Methods and Assumptions for Valuations Performed as of June 30, 2025

The entry age normal actuarial cost method of valuation is used in determining liabilities and normal cost. Regular actuarial valuations provide valuable information about the composite change in the unfunded actuarial accrued liabilities (whether or not the liabilities are increasing or decreasing, and by how much). Since the future cannot be predicted with precision, actual experience is expected to differ from assumed experience. Differences occurring in the past between assumed experience and actual experience (actuarial gains and losses) become part of actuarial accrued liabilities. Unfunded actuarial accrued liabilities are amortized to produce payments (principal and interest), which are expressed as a percent of payroll. A layered, closed 25-year amortization period was used for the June 30, 2025, valuations to determine the fiscal year 2027 contribution rates. The actuarial value is calculated by recognizing the difference between the actual and expected return on the fair value of assets each year over a closed five-year period.

The investment return rate assumption remained constant at 6.95% per year as of June 30, 2025, compounded annually (net of investment expenses). The price inflation assumption used was 2.25% per year. Projected salary assumptions were 2.75% to 10.00% for the MSEP and 3.00% for the Judicial Plan. The assumption used for annual post-retirement benefit increases (COLAs) is 4.0% (on a compound basis) when a minimum COLA is in effect. When no minimum COLA is in effect, the annual COLA is assumed to be 1.80% (80% of the 2.25% price inflation) on a compounded basis.

Investment Section

MOSERS has provided employee benefits for over 60 years. Our pension benefits are funded by three sources: employer contributions, employee contributions, and investment earnings. Over the long term, these investments generate income that lasts—and supports our members throughout their lifetimes.

Chief Investment Officer's Report

October 23, 2025

Dear Members,

During the fiscal year 2025, the total portfolio generated a time-weighted rate of return of 9.8%, net of all fees and expenses while risk remained slightly below that of our policy benchmark. This result exceeded the policy benchmark of 8.7% by 1.1%.

The outperformance led to approximately \$98 million in additional value being added to the MOSERS portfolio above our policy benchmark expectation. Total trust fund assets as of June 30, 2025, were just over \$9.5 billion. In addition, MOSERS paid out more than \$1.1 billion in benefits during the fiscal year to retirees and beneficiaries.

Portfolio returns were led by the Global Public Equities allocation which came in at 17.7%, outperforming its benchmark by more than 1.5%. The Alternative Beta portfolio was our best performer on a relative basis, outperforming its benchmark by 5.5% with a total return of 1.7% for the year. Private Credit and Hedge Funds were also strong performers on both a nominal and relative basis, returning 8.9% and 8.7%, respectively.

The Long Treasury portfolio, which is held primarily for its defensive and diversifying characteristics, continued to be a slight drag on the portfolio in the recent higher inflation and increasingly volatile interest rate environment. This portfolio still outperformed its benchmark return of -2.7% by approximately 0.4%.

Over the most recent 20-year period, ending June 30, 2025, the total fund's actual performance outperformed the policy benchmark over all rolling time periods, adding approximately \$2.4 billion in value to the trust fund versus an all index strategy over that time.

As of March 31st of this fiscal year, Staff fully implemented another one of the Board's recent portfolio goals, transitioning the Global Public Equity portfolio to one that does not include public equity securities from China.

As long-term investors, MOSERS recognizes the importance of portfolio diversification and investment discipline both during times of uncertainty and, over the long term. While the MOSERS portfolio is built to withstand all kinds of market uncertainties over time, the Board also undertakes a detailed portfolio review at least every five years for potential improvements and to reconfirm its soundness.

Over the next fiscal year, MOSERS staff will finish implementing changes previously approved by the Board, which are designed to improve the portfolio's return for the foreseeable future. These changes are being completed in a targeted and purposeful manner to ensure the long-term health and resilience of the MOSERS portfolio.

I look forward to working with the MOSERS Board and our highly talented and experienced staff continuing to provide secure, reliable retirement benefits to all our plan members.

Sincerely,

TJ Carlson
Chief Investment Officer

Investment Policy Summary

The investment policy summary serves as a reference point for management of System assets and outlines MOSERS' investment philosophy and practices. Investments within this report are presented on the basis of fair value using a variety of sources such as appraisals, valuations of underlying companies and assets for limited partnerships and commingled funds, and through fair values obtained from the investment custodian.

The purpose of MOSERS' investment program is to ensure that MOSERS' members and beneficiaries receive their benefits at a reasonable and predictable cost to their employers. Plan assets may be invested, reinvested, and managed by MOSERS' investment staff or third-party investment managers, subject to the terms, conditions, and limitations provided by law and contracts, where applicable.

The MOSERS Board is charged with the responsibility for investing the assets of the System in a manner consistent with fiduciary standards set forth in the prudent person rule and has adopted the following objectives and philosophies to guide all investment related decisions.

Investment Objectives

- Develop a Real Return Objective (RRO) intended to keep contribution rates at a reasonable level over long periods of time, absent changes in actuarial assumptions.
- Establish an asset allocation policy that is expected to meet the RRO, while minimizing the impact of the portfolio investments' volatility on the contribution rate.
- Maximize long-term investment returns by exposing plan assets to a prudent level of risk in order to support the goal of having sufficient funds available to meet projected benefit payment obligations.
- Monitor costs associated with the efficient implementation of the asset allocation policy through the use of internal and external resources.

Investment Philosophy

- A key risk to the portfolio is asset shortfall where assets are insufficient to meet promised benefit obligations. As a result, the Board will strive to minimize the potential for long-term impact from disproportionate drawdowns.
- MOSERS is willing to take measured risks for which it expects to be compensated, and will seek to avoid risks which may not be appropriately rewarded.
- The Board will employ a disciplined, objective, and quantitatively-driven asset/liability analysis process with the goal of determining the optimal asset allocation policy to meet the investment objectives.
- In order to meet the RRO, it is necessary for the Plan to maintain a significant allocation to growth (i.e., equity) assets. As a result, equity risk is expected to be the key contributor to the overall risk of the Plan's investments (Total Fund). In recognition of this, the Board's asset allocation policy will seek to mitigate the risk from large equity market declines.
- Strategic asset allocation is a significant factor influencing long-term investment performance and asset volatility. The asset allocation targets, determined by the Board, will be adhered to through clearly defined rebalancing guidelines.
- The Board will seek to cause the total fund to be broadly diversified in view of the fact that not all strategies will add value at all times, which should mitigate the impact of negative market environments over its long-term investment horizon.
- Risk management and performance benchmarking are integral to the investment program. The Board will establish and regularly monitor appropriate absolute and relative return risk as well as other key risks that affect the total fund.
- The Board recognizes the importance of benchmarking for monitoring how well investment decisions are fulfilling the Plan's objectives and will employ industry-accepted benchmarks for all asset classes for which the Board sets policy, using published market indices where feasible.
- Costs meaningfully impact investment returns and will be a consideration in all investment program decisions. Investment performance shall be reported net of fees to incorporate the full impact of fees and costs.

Roles and Responsibilities

Board of Trustees

The Board bears the ultimate fiduciary responsibility for the investment of System assets. Members of the Board must adhere to state law and prudent standards of diligence with respect to their duties as investment fiduciaries. Accordingly, they are required to discharge their duties in the interest of plan participants. They must also “act with the same care, skill, prudence, and diligence under prevailing circumstances that a prudent person, acting in a similar capacity and familiar with those matters, would use in the conduct of a similar enterprise with similar aims.”¹ Specifically related to investments, the Board is responsible for prudent oversight, governance, and management of the System’s assets.

Executive Director

The executive director is appointed by and serves at the pleasure of the Board. Pursuant to its authority to delegate functions to employees of the System under Section 104.1069, RSMo, the Board of Trustees has delegated to the executive director the responsibility to manage the staff that oversees and executes MOSERS’ investment program. The executive director selects, evaluates, and terminates the chief investment officer and is responsible for monitoring the investment program compliance, as established by policies set forth by the Board.

Chief Investment Officer (CIO) and Internal Staff

The CIO serves at the pleasure of the executive director and has primary responsibility for the overall direction of the investment program. The CIO works with the Board investment consultant and executive director in advising the Board on policies related to the investment program. The CIO has primary responsibility to make hiring and termination decisions related to money managers with the approval of the staff investment consultant. The CIO is also charged with the responsibility of making strategic allocation decisions within parameters established by Board policy. Other responsibilities of the CIO include monitoring the investment of System assets, oversight of external money managers and the internally managed portfolios, and keeping the Board apprised of situations that merit their attention. The internal investment staff is accountable to the CIO.

External Consultants

The Board investment consultant serves at the pleasure of the Board. The Board investment consultant’s primary duty is to provide the Board with independent and objective investment advice and assist the Board in making decisions and overseeing the investment program. Specifically, the Board investment consultant assists the Board in developing investment policy, recommends asset allocation policy as requested by the Board, and assists the Board in oversight of the investment program.

Staff investment consultants serve at the pleasure of the CIO. The primary responsibilities of the staff investment consultants are to provide independent and objective investment advice to the staff. Among other duties, as applicable, each staff investment consultant agrees in writing to the CIO’s proposed hiring or termination of external investment management firms and third-party plan administrators.

Chief Auditor

The chief auditor reports directly to the executive director and if, in the opinion of the chief auditor, circumstances warrant, may report directly to the Board. The chief auditor is independent of the System’s investment operations and, among other duties, is responsible for providing objective audit and review services for investment operations. It is the chief auditor’s objective to promote adequate and effective internal controls at a reasonable cost.

Master Custodian

BNY Mellon serves as the master custodian of the System’s assets except in cases where investments are held in partnerships, commingled accounts, or unique asset classes where it is impossible for them to do so. The master custodian is responsible for maintaining the official book of records, providing performance reports, and serving as an additional layer of risk control in the safekeeping of System assets.

¹ Section 105.688, RSMo - Investment Fiduciaries, Duties.

Asset Allocation

Determining the System's asset allocation is one of the most important decisions in the investment management process. The Board, with advice from the Board investment consultant and the CIO, adopted a portfolio allocation in February 2024 that is designed to provide the highest probability of meeting or exceeding the System's investment objectives at a controlled level of risk and with liquidity that is acceptable to the Board. In determining the optimal mix of assets, the Board considers factors such as:

- The expected risk of each asset class.
- The expected rate of return for each asset class.
- The correlation between the rates of return of the asset classes.
- The investment objectives and risk constraints of the fund.
- The impact of the portfolio's volatility on the contribution rate.

While the Board maintains a set policy allocation mix, they have taken steps to provide flexibility by granting authority to the CIO to make strategic allocation decisions to capitalize on attractively valued opportunities within prudent risk constraints. This flexibility has allowed the System to take advantage of changing market conditions. The table below illustrates the policy asset allocation and ranges formally adopted by the Board.

In May 2024, the Board adopted a two-year transition period from the old asset allocation to the newly adopted asset allocation to begin in fiscal year 2025. The table below represents the policy asset allocation as of June 30, 2025.

Asset Allocation

Asset Classes	Asset Allocation Policy	Asset Allocation Ranges ¹	Benchmark ²
Global Public Equity	35.0%	25% - 45%	MSCI All Country World Index (ACWI) ex-China
Global Private Equity	15.0%	10% - 20%	Custom Private Equity Benchmark ³
Treasuries	12.5%	7.5% - 17.5%	Bloomberg Long U.S. Treasury
US Treasuries	10.0%	5% - 15%	Bloomberg 7-10 Year Treasury Index

Private Real Assets	2.5%	0% - 7.5%	S&P Global Infrastructure
Public Real Assets	2.5%	0% - 7.5%	FTSE NAREIT
Hedge Funds	2.5%	0% - 7.5%	HFRI FoF: Conservative + 0.70%
Alt Beta	12.5%	7.5% - 17.5%	HFRX Macro/CTA
Private Credit	7.5%	2.5% - 12.5%	Morningstar LSTA U.S. Leveraged Loan + 1%

¹ The Board has granted the CIO the authority to operate within the risk allocation and policy asset allocation ranges.

² Benchmarks are net of MOSERS' actual leveraging costs on borrowed assets.

³ Custom Private Equity Benchmark is a weighted average roll-up of the underlying manager benchmarks which include State Street Private Equity Buyout Index/Burgiss Global Buyout Fund Index, MSCI ACWI ex-China Index, and Legacy Private Equity Returns.

Rebalancing

It is the responsibility of staff to ensure that the asset allocation adheres to the System's rebalancing policy. MOSERS utilizes a combination of cash market and derivative transactions to maintain the total portfolio's allocation at the broad policy level. Reviews are conducted at least monthly to bring the portfolio back within allowable ranges of the broad policy targets.

Risk Controls

MOSERS' investment program faces numerous risks; however, the primary risk to MOSERS is that the assets will not support the liabilities over long periods of time. In order to control this risk and numerous other risks that face the System, the Board has taken the following steps, on an ongoing basis, to help protect the System:

- Actuarial valuations are performed each year to ensure the System is on track to meet the funding objectives of the plan. In addition, every five years an external audit of the actuary is conducted to ensure that the assumptions being made and calculation methods being utilized are resulting in properly computed liabilities.
- Asset/liability studies are conducted at least once every five years. The purpose of these studies is to ensure that the current portfolio design is structured to meet the System's liabilities. During these studies, investment expectations are also re-examined in more detail.
- An investment policy statement is in place to ensure that Board policies are clearly identified. Within these documents, desired outcomes are identified, responsibilities for individuals are identified in relation to particular areas of the portfolio's management, and details are provided for measuring outcomes. Reporting requirements are clearly identified to ensure appropriate checks and balances are in place. In addition, annual performance audits are conducted to ensure the performance measurement tools and methodologies being utilized are proper.

Performance Objectives and Monitoring Process

Generating a total nominal rate of return net of expenses of at least 6.95% is the primary performance objective for the total portfolio. This return objective is equal to the RRO plus expected inflation.

The reason for the long-term focus on this objective is to preclude the temptation to overreact to events in the marketplace that have no relevance in the management of the relationship between the System's assets and liabilities. The resulting dilemma is the conflicting need to evaluate investment policy implementation decisions over shorter time frames while maintaining the longer-term focus necessary to manage and measure the fund's performance relative to the RRO. To address this problem, the Board evaluates performance relative to policy benchmarks. This helps to evaluate the Board's broad policy decisions and the staff and external consultant's implementation decisions. Policy benchmarks measure broad investment opportunities of each asset class in which MOSERS has chosen to invest. The difference between the policy benchmarks and the actual portfolio returns represent decisions made by the CIO to strategically deviate from the policy asset allocation for each asset class.

The policy benchmarks are used in the following manner to evaluate Board and staff decisions:

- **Board Decisions:** The value added through Board policy decisions is measured by the difference between the total fund policy benchmark return and the RRO plus expected inflation. This difference captures the value added by the Board through their policy asset allocation decisions relative to the return necessary to fund the System's liabilities. A policy benchmark return greater than the RRO reflects the achievement of the RRO goals. A policy benchmark return less than the RRO reflects losses or shortfalls in performance in funding the liabilities. These policy decisions are measured over long periods of time.
- **CIO and External Consultants' Decisions:** There are two components to decisions made by the CIO and external consultants, which are monitored by the Board on an ongoing basis. They are: 1) strategic allocation decisions, and 2) implementation decisions.

Strategy decisions are made by the CIO to deviate from the policy benchmark weight. Implementation decisions are money manager selection choices made by the CIO with the agreement of the appropriate external consultant and the acknowledgement from the executive director that the decision was made in accordance with the Board's adopted policy. The value added through both strategic and implementation decisions is measured by the difference between the actual portfolio return and the policy benchmark return. An actual portfolio return greater than the policy benchmark return reflects value added through these decisions of the CIO and the external consultants. An actual portfolio return less than the policy benchmark return reflects losses to the fund's performance based upon these decisions. These CIO and external consultant decisions should be measured over all periods of time with a majority weight placed on outcomes that have occurred over a market cycle.

The Board reviews performance information on a quarterly basis to help ensure adequate monitoring of the fund's overall performance objectives.

Total Fund Review

As of June 30, 2025, the MOSERS investment portfolio had a fair value of \$9.52 billion. The graph below illustrates the growth of MOSERS' portfolio since the System's inception.

Investment Performance

MOSERS' investments generated a time-weighted return of 9.8%, net of fees, for fiscal year 2025. The total fund return exceeded the 1-year policy benchmark of 8.7%. This additional 1.1% investment return produced approximately \$98 million in excess of what would have been earned if the fund had been invested passively in the policy benchmark.

Investment Performance vs. Required Rate of Return

The total fund investment return is compared to a required rate of return. The required rate of return is established by the Board to determine how well the fund is performing over the long term in order to meet future plan obligations after accounting for inflation. The required rate of return for fiscal year 2025 is 6.95%.

Given the volatility of the investment markets, the portfolio should not be expected to meet the required rate of return every year. A review of long periods of time is best to evaluate whether or not the total return has kept pace with the System's funding objectives.

A common actuarial practice of "asset smoothing" is used to reduce volatility in employer and employee contribution rates. The following chart shows the relationship between fair value returns (actual rate of return), the expected rate of return, and the actuarially smoothed rate.

* Performance returns are calculated using a time-weighted rate of return on fair values.

** Investment earnings in excess or deficient of the required rate of return are smoothed over a 5-year period for actuarial funding purposes.

Investment Performance vs. Benchmark Comparisons

In addition to measuring performance relative to the required rate of return, the Board also compares fund returns to the policy benchmark. Returns for the total fund versus policy benchmarks are displayed in the following bar chart.

** As of June 30, 2025, the total fund policy benchmark was comprised of the following components: 35.0% global public equities policy, 15% global private equities policy, 12.5% long treasuries policy, 10% U.S. treasuries policy, 5% core bonds policy, 2.5% commodities policy, 12.5% treasury inflation protected securities (TIPS) policy, 5% private real estate policy, 2.5% private real assets policy, 2.5% public real assets policy, 2.5% hedge funds policy, 12.5% alternative beta policy, and 7.5% private credit policy.*

Policy return components are adjusted for financing costs associated with the program where applicable.

The policy benchmark provides an indication of the returns that could have been achieved (excluding transaction costs) by a portfolio invested in the designated benchmarks for each asset class at the percentage weights allocated to each asset class in MOSERS' policy asset allocation. Comparison of the total return to the policy benchmark reflects the total value added or detracted by the CIO through strategic and manager implementation decisions. Value is added when the total fund return exceeds the policy benchmark return. The total fund 1-, 3-, 5-, 10-, 15-, and 20-year actual performance outperformed its policy benchmark by 1.1%, 0.8%, 0.9%, 0.7%, 0.7%, and 1.0%, respectively.

Total Fund Policy Allocation Overview

As of June 30, 2025, the Board's policy allocation and the actual strategic allocation to each asset class is shown in the bar graph below.

The Board has granted authority to the CIO to make strategic decisions. A strategic decision should be thought of as any decision that might cause MOSERS' actual portfolio to differ from the policy asset allocation.

Schedule of Brokerage Commissions

* Fund pass through expenses are administrative expenses charged to the fund and paid by the limited partners (including MOSERS), in addition or in lieu of management fees and incentive fees. These expenses may include, but are not limited to, accounting, audit, legal, and custody expenses directly related to the administration of the underlying fund investments and pass through management fees and incentive fees.

Asset Class Summary

As of the end of FY25, the portfolio consists of thirteen investment asset classes: global public equities, global private equities, long treasuries, U.S. treasuries, core bonds, commodities, TIPS, private real estate, private real assets, public real assets, hedge funds, alternative beta, and private credit. Two of the asset classes, U.S. treasuries and private real assets, were new allocations and were initiated during FY25. Of the eleven asset classes that existed at the beginning of the fiscal year, all but one had positive performance during the fiscal year. Long treasuries was the only asset class with a negative annual return.

Global Public Equities

The global public equities allocation is designed to provide capital appreciation by accessing an equity risk premium. In addition, it is expected that investments in this category would perform well in periods of rising economic growth. Investments in this allocation include U.S. and non-U.S. equity investments with varying characteristics related to market capitalization and investment style. Because of the non-U.S. nature of some of these investments, this allocation is subject to some foreign currency exposure.

The market exposure of the global public equities allocation on June 30, 2025, was \$3.35 billion, representing 35.2% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. For the fiscal year, the global public equities allocation returned 17.7% versus 16.2% for the policy benchmark. This outperformance was the result of manager implementation decisions that outperformed the benchmark. The bar chart below (right) illustrates actual performance as compared to the policy benchmark.

Global Private Equities

The global private equities allocation is designed to provide capital appreciation by accessing both an equity risk premium and an illiquidity risk premium. In addition, it is expected that investments in this category would perform well in periods of rising economic growth. Investments in this allocation include U.S. and non-U.S. equity investments with varying characteristics related to market capitalization and investment style. Because of the non-U.S. nature of some of these investments, this allocation is subject to some foreign currency exposure.

The market exposure of the global private equities allocation on June 30, 2025, was \$1.42 billion, representing 14.9% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. For the fiscal year, the global private equities allocation returned 6.5% versus 8.3% for the policy benchmark. This underperformance was the result of manager implementation decisions that underperformed the benchmark. The bar chart below (right) illustrates actual performance as compared to the policy benchmark.

Long Treasuries Allocation

This allocation is designed to provide a source of current income and to reduce overall fund volatility. It is expected that investments in this asset class will perform well in periods of stable or falling economic growth and falling inflation. Investments in this asset class include U.S. bonds that have been issued, collateralized, or guaranteed by the U.S. Government, its agencies, or its instrumentalities. Because this asset class is invested in all U.S. bonds, there is currently not any foreign currency exposure as part of this allocation.

As of June 30, 2025, the market exposure of the long treasuries allocation was \$1.19 billion, representing 12.5% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. For the fiscal year, the long treasuries allocation returned (2.3)% as compared to (2.7)% for the policy benchmark. There was no internal or external active management strategy utilized during the fiscal year; thus providing a return that closely matched the benchmark. The bar chart below (right) illustrates actual performance as compared to the policy benchmark.

U.S. Treasuries Allocation

This allocation is designed to provide a source of current income and to reduce overall fund volatility. It is expected that investments in this asset class will perform well in periods of stable or falling economic growth and falling inflation. Investments in this asset class may include U.S. bonds that have been issued, collateralized, or guaranteed by the U.S. Government, its agencies, or its instrumentalities. Because this asset class is invested in all U.S. bonds, there is currently not any foreign currency exposure as part of this allocation.

As of June 30, 2025, the market exposure of the U.S. treasuries allocation was \$945 million, representing 9.9% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. The U.S. treasuries allocation was initiated during the fiscal year, therefore, 1-year returns are not available yet.

Core Bonds Allocation

This allocation is designed to provide a source of current income and to reduce overall fund volatility. It is expected that investments in this asset class will perform well in periods of stable or falling economic growth and falling inflation. Investments in this asset class include U.S. bonds that have been issued, collateralized, or guaranteed by the U.S. Government, its agencies, or its instrumentalities. Core bonds may also include debt issued by corporations, or securitized debt. Because this asset class is invested in all U.S. bonds, there is currently not any foreign currency exposure as part of this allocation.

As of June 30, 2025, the market exposure of the core bonds allocation was \$472 million, representing 5.0% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. For the fiscal year, the core bonds allocation returned 7.7% as compared to 6.1% for the policy benchmark. The outperformance was mainly driven by portfolio implementation decisions that outperformed the policy benchmark by 1.6%. The bar chart below (right) illustrates actual performance as compared to the policy benchmark.

Treasury Inflation Protected Securities (TIPS)

It is expected that investments in this asset class will perform well during periods of rising inflation. TIPS are designed to provide a source of current income and protect against actual inflation. It is expected that investments in this asset class will perform well during periods of falling economic growth and rising inflation. Because this asset class is invested in all U.S. bonds, there is currently not any foreign currency exposure as part of this allocation.

As of June 30, 2025, the market exposure of the TIPS allocation was \$1.18 billion representing 12.5% of total market value of the portfolio. For the fiscal year, TIPS returned 2.9% versus 2.7% for the policy benchmark. There was no internal or external active management strategy utilized during the fiscal year; thus providing a return that closely matched the benchmark.

Commodities

Commodities are designed to provide protection from an unexpected rise in inflation. In addition, it is expected that investments in this category would perform well in periods of rising economic growth. Because this asset class is invested in U.S. denominated assets, there is not any foreign currency exposure as part of this allocation.

As of June 30, 2025, the market exposure of the commodities allocation was \$234 million representing 2.5% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. For the fiscal year, the commodities allocation returned 0.9% versus 1.0% for the policy benchmark. There was no internal or external active management strategy utilized during the fiscal year; thus providing a return that closely matched the benchmark. The bar chart below (right) illustrates actual performance as compared to the policy benchmark.

Private Real Estate

Private real estate is designed to provide capital appreciation and income and provide access to a form of equity risk premium and liquidity risk premium. It is expected that investments in this category would perform well in periods of rising economic growth and rising inflation. Because this asset class is invested primarily in U.S. denominated assets, there is not expected to be meaningful foreign currency exposure as part of this allocation.

As of June 30, 2025, the market exposure of the private real estate allocation was \$439 million representing 4.6% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. For the fiscal year, the private real estate allocation returned 2.1% versus 2.7% for the policy benchmark. The underperformance was mainly driven by manager implementation decisions that underperformed the policy benchmark. The bar chart below (right) illustrates actual performance as compared to the policy benchmark.

Public Real Assets

Public real assets are designed to provide capital appreciation and income and provide access to a form of equity risk premium. In addition, it is expected that investments in this category would perform well in periods of rising economic growth and rising inflation. Because this asset class is invested primarily in U.S. denominated assets, there is not expected to be meaningful foreign currency exposure as part of this allocation.

As of June 30, 2025, the market exposure of the public real assets allocation was \$230 million representing 2.4% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. For the fiscal year, the public real assets allocation returned 8.5% versus 8.5% for the policy benchmark. There was no internal or external active management strategy utilized during the fiscal year; thus providing a return that closely matched the benchmark. The bar chart below (right) illustrates actual performance as compared to the policy benchmark.

Private Real Assets

Private real assets are designed to provide capital appreciation and income while accessing a differentiated form of equity and credit risk premiums. In addition, it is expected that investments in this category would perform well in periods of rising economic growth and rising inflation. Because this asset class is invested primarily in U.S. denominated assets, there is not expected to be meaningful foreign currency exposure as part of this allocation.

As of June 30, 2025, the market exposure of the private real assets allocation was \$236 million representing 2.5% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. The private real assets allocation was initiated during the fiscal year, therefore, 1-year returns are not available yet.

Alternative Beta Allocation

This asset class is designed to provide a source of stable returns and low correlations with traditional asset strategies. In addition, it is expected that investments in this category would perform well across multiple economic environments. As a result of the multitude of strategies being deployed, it is expected that this asset class will provide meaningful diversification to the portfolio. Because of the non-U.S. nature of some of these investments, this allocation is subject to some foreign currency exposure.

As of June 30, 2025, the market exposure of the alternative beta allocation was \$1.20 billion, representing 12.6% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. For the fiscal year, alternative betas returned 1.7% versus (3.8)% for the policy benchmark. The outperformance was primarily related to manager implementation decisions.

Hedge Fund Allocation

Similar to alternative betas, the hedge fund asset class is designed to provide a source of stable returns and low correlations with traditional asset strategies. In addition, it is expected that investments in this category would perform well across multiple economic environments.

As a result of the multitude of strategies being deployed, it is expected that this asset class will provide meaningful diversification to the portfolio. Because of the non-U.S. nature of some of these investments, this allocation is subject to some foreign currency exposure.

As of June 30, 2025, the market exposure of the hedge fund allocation was \$240 million, representing 2.5% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. The hedge fund allocation returned 8.7% for the fiscal year versus 6.3% for the policy benchmark. The outperformance was mainly driven by manager implementation decisions that outperformed the policy benchmark. The bar chart below (right) illustrates actual performance as compared to the policy benchmark.

Private Credit Allocation

The private credit asset class is designed to provide a source of current income and provide access to a form of credit risk premium. In addition, it is expected that investments in this category would perform well in periods of rising economic growth. Because of the non-U.S. nature of some of these investments, this allocation is subject to some foreign currency exposure.

As of June 30, 2025, the market exposure of the private credit allocation was \$707 million, representing 7.4% of total market value of the portfolio. The bar chart below (left) illustrates the actual exposure compared to policy. The private credit allocation returned 8.9% for the fiscal year versus 8.3% for the policy benchmark. The outperformance was mainly driven by manager implementation decisions that outperformed the policy benchmark. The bar chart below (right) illustrates actual performance as compared to the policy benchmark.

Actuarial Section

Service is an investment that creates lasting value—time well spent serving the citizens of Missouri, ensuring a lifetime pension benefit for members of MOSERS. It's a commitment that honors the past, supports the present, and secures the future for those who dedicate their careers to public service.

Actuary's Certification Letter

September 10, 2025

The Board of Trustees
Missouri State Employees' Retirement System
907 Wildwood Drive
Jefferson City, Missouri 65109

Dear Members of the Board:

At your request, we performed an actuarial valuation of the Missouri State Employees' Retirement System (MOSERS) as of June 30, 2025, for the purpose of determining the employer required contribution rate for the fiscal year ending June 30, 2027. This report provides valuation results for the Missouri State Employees' Plan (MSEP) and the Judicial Retirement Plan. The major findings of the valuation are contained in this report, which reflects the benefit provisions in place on June 30, 2025. There have been no changes to the plan provisions or actuarial assumptions since the prior valuation. However, the minimum employer contribution rate in the Funding Policy increased, as scheduled, from 30.25% in last year's valuation to 32.00% in the current valuation.

During the 2022 Missouri General Assembly, legislation was passed and signed by the Governor that provided for an additional contribution to the System of \$500 million. The funds were received by MOSERS on July 13, 2022. At the Board's direction, the accumulated balance of the additional contribution of \$500 million is included in the determination of the funded ratio and unfunded actuarial accrued liability but is excluded from the valuation assets when calculating the actuarial required contribution rate.

In preparing our report, we relied, without audit, on information (some oral and some in writing) supplied by the System's staff. This information includes, but is not limited to, statutory provisions, member data, and financial information. We found this information to be reasonably consistent and comparable with the information received in the prior year. The valuation results depend on the integrity of this information. If any of this information is inaccurate or incomplete, our results may be different, and our calculations may need to be revised.

We further certify that all costs, liabilities, rates of interest, and other factors for the Plans have been determined on the basis of actuarial assumptions and methods which are individually reasonable (taking into account the experience of each Plan and reasonable expectations); and which, in combination, offer the best estimate of anticipated experience affecting the Plans, and meet the parameters set by Actuarial Standards of Practice. Nevertheless, the emerging costs will vary from those presented in this report to the extent actual experience differs from that projected by the actuarial assumptions. The MOSERS Board has the final decision regarding the appropriateness of the assumptions, and adopted them as indicated in Appendix D of our *MSEP Actuarial Valuation Report* and Appendix C of our *Judges Actuarial Valuation Report*.

In order to prepare the results in the actuarial valuation report, we have utilized actuarial models that were developed to measure liabilities and develop actuarial costs. These models include tools that we have produced and tested along with commercially available valuation software that we have reviewed to confirm the appropriateness and accuracy of the output. In utilizing these models, we develop and use input parameters and assumptions about future contingent events along with recognized actuarial approaches to develop the needed results. Future actuarial measurements may differ significantly from the current measurements presented in the June 30, 2025, valuation reports due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the Plan's funded status); and changes in plan provisions or applicable law. Due to the limited scope of our assignment, we did not perform an analysis of the potential range of future measurements.

The actuarial computations presented in this section are for purposes of determining the funding amounts for MSEP and the Judicial Retirement Plan as set out in the Missouri state statutes. The calculations have been made on a basis consistent with our understanding of the Plans' funding policy. Determinations for purposes other than meeting these requirements may be significantly different from the results shown in the June 30, 2025, valuation reports. Accordingly, additional determinations may be needed for other purposes.

The consultants who worked on this assignment are pension actuaries with substantive experience valuing public retirement systems. CavMac's advice is not intended to be a substitute for qualified legal or accounting counsel.

On the basis of the foregoing, we certify that, to the best of our knowledge and belief, the June 30, 2025, actuarial valuation reports are complete and accurate and have been prepared in accordance with generally recognized and accepted actuarial principles and practices. We are members of the American Academy of Actuaries and meet the Qualification Standards to render the actuarial opinion contained herein.

Sincerely,

Patrice A. Beckham, FSA, EA, FCA, MAAA
Consulting Actuary

Bryan K. Hoge, FSA, EA, FCA, MAAA
Principal and Consulting Actuary

Summary of Actuarial Assumptions

Actuarial Methods

Calculation of Normal Cost and Actuarial Accrued Liability

The funding method used to determine the normal cost and actuarial accrued liability was the entry age actuarial cost method described below.

- **Entry age actuarial cost method** – Under the entry age normal cost method, the actuarial present value of each member's projected benefit is allocated on a level basis over the member's compensation between the entry age of the member and their assumed exit age. The portion of the actuarial present value allocated to the valuation year is called the normal cost. The actuarial present value of benefits allocated to prior years of service is called the actuarial accrued liability. The unfunded actuarial accrued liability represents the difference between the actuarial accrued liability and the actuarial value of assets as of the valuation date. The unfunded actuarial accrued liability is calculated each year and reflects experience gains/losses.
- **Calculation of the actuarial value of assets (AVA)** – The Board adopted the current asset smoothing method effective with the June 30, 2018, valuation. Under the current method, the difference between the actual and assumed investment return on the fair value of assets is recognized evenly over a five-year period. No corridor is used with this method.
- **Amortization of the unfunded actuarial accrued liability (UAAL)** – Beginning with the June 30, 2018, valuation, the UAAL is amortized using a "layered" approach. Under this method, the "Legacy UAAL," as determined in the June 30, 2018, valuation, is amortized over a closed 30-year period. Subsequent changes in the UAAL due to actuarial gains/losses or assumption changes are separately financed by establishing amortization bases and payments, as a level percentage of payroll, over closed 25-year periods. The bases established prior to June 30, 2021, continue to be amortized on their original schedule. Any change in the System's benefit structure shall be amortized over a closed period of 20 years, as set out in state statutes. The total UAAL amortization payment is the sum of the payments for each of the amortization bases.

If the System has a negative UAAL (surplus), all prior amortization bases will be eliminated, and a new, single amortization base shall be established and funded over an open 30-year amortization period until the valuation indicates a positive UAAL exists. At that time, the amortization base shall be re-established equal to the amount of the UAAL and amortized over a closed 25-year period.

On July 13, 2022, the state of Missouri made an additional contribution of \$500 million to the MOSERS trust fund. This additional contribution will grow with investment returns in the future, and it will be reflected in the System's funded ratio and UAAL. At the Board's direction, the accumulated balance of the additional contribution of \$500 million will not be reflected in the valuation assets when calculating the unfunded actuarial accrued liability contribution rate, which then impacts the actuarial required contribution rate. The determination of the actuarial contribution rate in future years will not reflect the impact of the additional contribution until so directed by the MOSERS Board.

- **Minimum employer contribution rate**

In September 2023, the Board voted to increase the minimum employer contribution rate from 16.97% of pay for all years to 28.75% of pay in fiscal year 2025, 30.25% of pay in fiscal year 2026, and 32% of pay thereafter. The minimum contribution rate still expires once the System reaches a funded ratio of 80%.

Changes in Methods and Assumptions Since the Prior Year

An experience study, which analyzed the System's economic and demographic assumptions, was performed in 2021, and the results were presented to the Board. There have been no changes to the benefit provisions or actuarial assumptions since the prior valuation.

Actuarial Assumptions

Economic Assumptions

- **Investment return** – 6.95%, compounded annually, net of investment expenses
- **Inflation** – 2.25% per year
- **Payroll growth** – 2.25% per year
- **Cost-of-living adjustment (COLA)** – 4.00% on a compounded basis when a minimum COLA of 4.00% is in effect; 1.80% on a compounded basis when no minimum COLA is in effect
- **Interest on member contributions** – 1.50% per year
- **Administrative expenses** – Actual prior year expenses are assumed for the current year
- **Pay Increases:**
 - **MSEP** – 2.75% - 10.00% based on years of service; General Assembly members have a flat 2.50% assumption; See table on page 95 for pay increase assumptions by years of service.
 - **Judicial Plan** – 3.00% per year

Demographic Assumptions

- **Mortality** – The mortality assumption includes an appropriate level of conservatism that reflects expected future mortality improvement.

MSEP/MSEP 2000/MSEP 2011

- **Post-retirement (Retirees)** – Pub-2010 General Members Below Median Healthy Retiree mortality table, scaled by 104%, set back two years for males and set forward one year for females, and projected generationally from 2010 to 2020 using Scale MP-2020 and 75% of Scale MP-2020 for years after 2020
- **Post-retirement (Beneficiaries)** – Pub-2010 General Members Below Median Contingent Survivor mortality table, set back two years for males and set forward one year for females, and projected generationally from 2010 to 2020 using Scale MP-2020 and 75% of Scale MP-2020 for years after 2020
- **Pre-retirement** – Pub-2010 General Members Below Median Employee mortality table, set back two years for males and set forward one year for females, and projected generationally from 2010 to 2020 with Scale MP-2020 and 75% of Scale MP-2020 for years after 2020
- **Long-term disability** – Pub-2010 Non-Safety Disabled Retiree mortality table, without mortality projection

Judicial Plan

- **Post-retirement (Retirees)** – Pub-2010 General Members Median Healthy Retiree mortality table, projected generationally from 2010 to 2020 with Scale MP-2020 and 75% of Scale MP-2020 for years after 2020
- **Post-retirement (Beneficiaries)** – Pub-2010 General Members Median Contingent Survivor mortality table, projected generationally from 2010 to 2020 with Scale MP-2020 and 75% of Scale MP-2020 for years after 2020
- **Pre-retirement** – Pub-2010 General Members Median Employee mortality table, projected generationally from 2010 to 2020 with Scale MP-2020 and 75% of Scale MP-2020 for years after 2020
- **Long-term disability** – None
- **Termination:**
 - **MSEP** – 1.25% - 27.00% based on years of service; Elected Officials and Legislators 5.00% - 35.00% based on years of service; See tables on pages 93-95 for termination assumptions by years of service.
 - **Judicial Plan** – 2.00% per year

The actuarial valuation computations were made by or under the supervision of a Member of the American Academy of Actuaries (MAAA). Assumptions were adopted based on the findings of the experience study covering the five-year period ending June 30, 2020, and presented to the Board in 2021.

Other Assumptions June 30, 2025

- **Form of payment**

MSEP

- 50% Joint & Survivor

MSEP 2000/MSEP 2011

- Straight life annuity

Judicial Plan

- First employed before January 1, 2011 – 50% Joint & Survivor
- First employed on or after January 1, 2011 – Straight life annuity

- **Marital status**

MSEP/MSEP 2000/MSEP 2011

- **Percent married** – 65% married at retirement, 50% of those dying in active service are married.
- **Spouse's age** – Females assumed to be three years younger than males.

Judicial Plan

- **Percent married** – 90% married
- **Spouse's age** – Females assumed to be four years younger than males.

- **Pay increase timing** – Pay increases are assumed to occur at the beginning of the fiscal year.
- **Decrement timing** – Decrements of all types are assumed to occur mid-year.
- **Eligibility testing** – Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
- **Benefit service** – Exact fractional service is used to determine the amount of the benefit payable.
- **Decrement relativity** – Decrement rates are used directly from the experience study without adjustment for multiple decrement table effects.
- **Decrement operation** – Disability and withdrawal do not operate during normal retirement eligibility.
- **Other liability adjustments**

MSEP/MSEP 2000

- **Pre-retirement survivor benefits for spouse of an inactive-vested member** – These factors are used to estimate the cost of immediate unreduced survivor annuities upon the death of a vested member.

Age	Male	Female
<30	1.56	1.42
30-39	1.26	1.20
40-49	1.11	1.08
>49	1.02	1.02

- **Incidence of contributions** – Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report and the actual payroll payable at the time contributions are made. New entrant normal cost contributions are applied to the funding of new entrant benefits.
- **Retirement election**

MSEP 2000

- All regular state employees first employed on or before June 30, 2000, are assumed to elect MSEP 2000 prior to age 62 and MSEP on or after age 62.
- Elected officials, General Assembly members, and uniformed water patrol members first employed before July 1, 2000, are assumed to elect MSEP at retirement.

- **Service adjustment**

MSEP/MSEP 2000

- It is assumed that each member will be granted seven months of service credit; four months for unused sick leave upon retirement and three months for military service purchases.

MSEP 2011

- It is assumed that each member will be granted five months of service credit for unused sick leave upon retirement. These members are not eligible for military service purchases.

- **Forfeitures**

MSEP 2011/Judicial Plan

- For those first employed on or after January 1, 2011, employees are assumed to take a refund and forfeit their deferred pension if the refund amount is greater than the present value of their deferred benefit.

- **Salary and benefit limits** – For purposes of the valuation, no limits were applied to member compensation or benefits.

- **Commencement age for deferred vested benefit** – Normal retirement date

- **Data Adjustments**

MSEP/MSEP 2000/MSEP 2011

Active and retired member data were reported as of May 31, 2025. It was brought forward to June 30, 2025, by adding one month of service for all active members, one month of contributions and interest for MSEP 2011 members, and the June COLA for certain retired members. Financial information continues to be reported annually as of June 30. This procedure was instituted to provide sufficient time for the Board of Trustees to certify the appropriate contribution rate prior to the October 1 statutory deadline.

Active members reported with less than a \$100 annualized salary were assumed to receive the average active member pay. As a result, there are 14 active members in the June 30, 2025, data whose salary is assumed to be \$58,500.

When the option of choosing plans is available, inactive-vested members are reported with two records, one with benefits under the MSEP and one with benefits under the MSEP 2000. Because it is unknown what the member will elect at retirement, both records are valued, and the plan that produces the higher present value of future benefits is used for valuation purposes.

For any retired member who has elected a joint and survivor benefit, yet has no beneficiary date of birth provided, it was assumed that the beneficiary is three years younger for male retirees and three years older for female retirees.

Judicial Plan

Active and retired member data were reported as of May 31, 2025. It was brought forward to June 30, 2025, by adding one month of service for all active members, one month of contributions and interest for Judicial Plan 2011 members, and the June COLA for certain retired members. Financial information continues to be reported annually as of June 30. This procedure was instituted to provide sufficient time for the Board of Trustees to certify the appropriate contribution rate prior to the October 1 statutory deadline.

Active members reported with no annualized salary were assumed to receive the average active member pay.

Other Technical Valuation Procedures

Salary increases are assumed to apply to annual amounts.

Decrement rates are assumed to occur mid-year, except that immediate retirement is assumed for those who are at or older than the age at which retirement rates are 100%.

No actuarial liability is included for participants who terminated without being vested prior to the valuation date, except those due a refund of contributions.

Pension Trust Funds

Employer Schedules of Funding Progress

Last Ten Fiscal Years

MOSERS uses the entry age normal actuarial cost method, which allocates the actuarial present value of each member's projected benefits on a level basis over the member's pensionable compensation between the entry age of the member and assumed exit ages.

Analysis of Financial Experience

Year Ended June 30, 2025

Actual experience will never coincide exactly with assumed experience (except by coincidence). Gains and losses may offset each other over a period of years, but sizable year-to-year variations from assumed experience are common. Detail on the analysis of the financial experience is shown below. A more detailed discussion of the components of our actuarial experience can be found in our June 30, 2025, actuarial valuation report, which is available on our website, www.mosers.org.

MSEP		Valuation Date June 30	Actuarial Gain (Loss) as a % of Beginning Accrued Liabilities
Unfunded actuarial accrued liability (UAAL) at beginning of year	\$ 7,559,270,608	2025	(1.7)%
Normal cost from last valuation	190,592,804	2024	(4.7)
Actual employer and member contributions	(816,955,882)	2023	(5.8)
Miscellaneous income	(1,003)	2022	(1.3)
Administrative expenses	13,313,154	2021	(0.7)
Interest accrual	511,157,950	2020	(2.3)
Expected UAAL	7,457,377,631	2019	(1.8)
Less: Actual UAAL at end of year	(7,750,793,572)	2018	(0.9)
Gain (loss) during year from experience	\$ (293,415,941)	2017	(1.6)
Gain (loss) as a percent of expected actuarial accrued liabilities at start of year (\$17,173,698,840)	(1.7)%	2016	(3.2)

Judicial		Valuation Date June 30	Actuarial Gain (Loss) as a % of Beginning Accrued Liabilities
Unfunded actuarial accrued liability (UAAL) at beginning of year	\$ 465,945,481	2025	(2.4)%
Normal cost from last valuation	12,967,296	2024	(2.8)
Actual employer and member contributions	(46,910,781)	2023	(3.2)
Miscellaneous income	(3)	2022	0.5
Administrative expenses	109,769	2021	1.4
Interest accrual	31,685,419	2020	(0.2)
Expected UAAL	463,797,181	2019	(0.8)
Less: Actual UAAL at end of year	(480,263,383)	2018	(0.3)
Gain (loss) during year from experience	\$ (16,466,202)	2017	(0.3)
Gain (loss) as a percent of expected actuarial accrued liabilities at start of year (\$682,891,796)	(2.4)%	2016	0.1

Comparison of Plans for General State Employees

Normal Retirement <i>Eligible for unreduced pension benefit once age and service requirements are met</i>	- Age 55 + 5 years of service, or - Rule of 80 – (at least age 48) Age + years of service = 80 or more <i>Age 50 if first became eligible prior to Aug. 28, 2003</i>	- Age 62 + 5 years of service, or - Rule of 80 – (at least age 48) Age + years of service = 80 or more <i>Age 50 if first became eligible prior to Aug. 28, 2003</i> <i>Inactive-vested members ineligible for Rule of 80</i>
Base Benefit <i>Monthly benefit payable for life</i>	.016 x FAP x Service increased by 33% <i>Future formula increases, if any, may be passed along to retirees</i>	.017 x FAP x Service <i>Future formula increases, if any, will not be passed along to retirees</i>

Eligibility for membership in the MSEP and MSEP 2000 is closed for uniformed members of the water patrol. Employees hired on or after January 1, 2011, are members of the Missouri Department of Transportation and Patrol Employees' Retirement System (MPERS).

Comparison of Plans for Uniformed Members of the Water Patrol (continued)

June 30, 2025

Benefit Provisions	MSEP (Closed Plan)	MSEP 2000
Temporary Benefit <i>Stops at age 62</i>	Not available	$.008 \times \text{FAP} \times \text{Service}$ <i>Available to members retiring under Rule of 80</i>
BackDROP <i>Lump-sum payment at retirement in addition to reduced monthly pension</i>	Must work at least 2 years beyond normal retirement eligibility to be eligible; elect BackDROP at retirement (if applicable)	Must work at least 2 years beyond normal retirement eligibility to be eligible; elect BackDROP at retirement (if applicable)
Benefit Payment Options <i>Determines whether a benefit will be paid to anyone after member's death</i>	- Life Income Annuity - Unreduced Joint & 50% Survivor - Joint & 100% Survivor - Life Income with 60 Guaranteed Payments - Life Income with 120 Guaranteed Payments	- Life Income Annuity - Joint & 50% Survivor - Joint & 100% Survivor - Life Income with 120 Guaranteed Payments - Life Income with 180 Guaranteed Payments
Cost-of-Living Adjustment (COLA) <i>Helps offset effects of inflation increasing the cost of goods and services</i>	Employed before Aug. 28, 1997 Receive 4-5% each year until reaching 65% COLA cap. After reaching cap, rate is based on 80% of the percentage increase in the average CPI (0-5%) Employed on/after Aug. 28, 1997 Based on 80% of the percentage increase in the average CPI (0-5%)	Based on 80% of the percentage increase in the average CPI (0-5%)
In-Service COLA <i>Service beyond age 65</i>	COLA given for service beyond age 65 <i>COLA provisions determined by employment date</i>	Not available

Eligibility for membership in the MSEP and MSEP 2000 is closed for uniformed members of the water patrol. Employees hired on or after January 1, 2011, are members of the Missouri Department of Transportation and Patrol Employees' Retirement System (MPERS).

Life Insurance Plans

June 30, 2025

MOSERS administers basic and optional term life insurance plans for eligible state employees and retirees.

Active Members*

Plan Provision	Requirement
• Basic life insurance An amount equal to one times annual salary (with a minimum of \$15,000) while actively employed.	• Actively employed in an eligible state position resulting in membership in MOSERS.
• Duty-related death benefit Duty-related death benefit equivalent to two times the annual salary the member was earning at the time of death, in addition to the basic life insurance amount of one times annual salary.	• Actively employed in an eligible state position resulting in membership in MOSERS.
• Optional life insurance Additional life insurance may be purchased in a flat amount in multiples of \$10,000, not to exceed the maximum (lesser of six times annual salary or \$800,000). Spouse coverage may be purchased in multiples of \$10,000 up to a maximum of \$100,000; however, the amount of spouse coverage cannot exceed the amount of optional life insurance coverage the member has purchased. Coverage for children is available in a flat amount of \$10,000 per child.	• Actively employed in an eligible state position resulting in membership in MOSERS.

* Terminating employees may port or convert coverage up to the amount they had as an active employee at individual rates. Not available to employees of the Department of Conservation and universities except Lincoln University and State Technical College of Missouri.

Retired Members

Plan Provision	Requirement
• Basic life insurance at retirement \$5,000 basic life insurance during retirement.	• Must retire directly from active employment.
• Optional life insurance at retirement (MSEP) A member may retain up to the lesser of \$60,000 or the amount of optional life insurance coverage held at the time of retirement at the group rate and may convert any remaining basic and optional life insurance at individual rates. Coverage for spouse ends at member's retirement and may be converted at individual rates.	• Must retire directly from active employment.
• Optional life insurance at retirement (MSEP 2000) Under "Rule of 80", a member may retain the current amount of coverage prior to retirement until age 62, at which time coverage is reduced to \$60,000, and may convert any remaining basic and optional life insurance at individual rates. Coverage for spouse ends at member's retirement and may be converted at individual rates.	• Must retire directly from active employment.
• Optional life insurance at retirement (MSEP 2011) Under "Rule of 90", a member may retain the current amount of coverage prior to retirement until age 62, at which time coverage is reduced to \$60,000, and may convert any remaining basic and optional life insurance at individual rates. Coverage for spouse ends at member's retirement and may be converted at individual rates.	• Must retire directly from active employment.

Note: Insured employees may port or convert their life insurance and their dependent life insurance when their coverage has been reduced or terminated if they meet certain qualifications.

Long-Term Disability (LTD) Insurance Plans

June 30, 2025

MOSERS administers the LTD Plan for eligible state employees who become disabled during active employment.

Active Members

Classification	Requirement
General state employees, legislators, and elected state officials Members of MOSERS in a position normally requiring at least 1,040 hours of work per year are covered under the LTD plan, unless they work for a state agency that has its own LTD plan.	Eligible participants receive 60% of their compensation minus primary Social Security, Workers' Compensation, and employer-provided income. Benefits commence after 90 days of disability or when sick leave benefits are no longer payable, whichever occurs last. LTD benefits cease upon the earliest of (i) when disability ends, (ii) when the member is first eligible for normal retirement benefits or is receiving early retirement benefits, (iii) upon a member's death, (iv) the date benefits become payable under any other group long-term disability insurance plan, or (v) the date the member fails to provide proof of continued disability and entitlement to LTD benefits. In addition to any of the reasons listed above, LTD monthly benefits for legislators and statewide elected officials will end when the total credited service accrued as a legislator or a statewide elected official, either through active employment and/or while on long-term disability, equals the corresponding constitutional service limitations (i.e., term limits).
Water patrol	Uniformed members who are eligible for statutory occupational disability receive benefits equal to 50% of compensation with no offset for Social Security at the time of disability. For nonoccupational disabilities, eligible participants receive the same benefit as general employees.
Judges	In addition to the disability benefits provided to general employees, judges may receive benefits under the state constitution. Participants may receive 50% of salary until the current term expires.

Changes in Plan Provisions

The 2025 Missouri legislative session ended on May 16. There were two bills that directly impacted MOSERS.

House Bill 5 - The General Assembly appropriated more than \$817 million in House Bill 5 to the Office of Administration to pay the required employer contribution payments to MOSERS for state fiscal year 2026 to fund the MSEP, the Judicial Plan, life insurance premiums, and long-term disability premiums. The bill also appropriated \$34.8 million to fully fund the deferred compensation employer match of up to \$75 per month (with a minimum contribution of \$25 per month). House Bill 5 was vetoed in part by the Governor on June 30, 2025; however, the MOSERS-related provisions were unaffected.

House Bill 147 - The General Assembly also passed House Bill 147, a pension omnibus bill. The provisions in this bill that will apply to MOSERS include modifications to fiduciary provisions related to Environmental, Social, and Governance, or ESG, considerations and proxy voting; restrictions on or required divestment from certain investments, with exemptions; and language allowing public retirement systems to close investment-related records. MOSERS' policy is already aligned with these provisions. House Bill 147 was approved by the Governor on July 14, 2025.

Statistical Section

MOSERS reached a major milestone with the successful implementation of our new pension administration system. This advanced platform streamlines complex processes, improves data accuracy, enhances member engagement, and lays the foundation for continued growth. Every hour invested in modernization moves us forward, ensuring a more responsive, reliable, and sustainable future for MOSERS and its members.

Overview

The *Statistical Section* presents detailed information as a context for understanding what the information in the *Financial Statements*, note disclosures, and *Required Supplementary Information* says about MOSERS' overall financial health.

Financial Trends Information

- *Changes in Fiduciary Net Position* – This schedule presents financial trend information for the most recent ten fiscal years.
- *Deductions from Net Position for Benefits and Refunds by Type* – This information is intended to help the reader assess how benefit payments have changed over time.
- *Valuation Assets (Smoothed Fair Value) vs. Pension Liabilities* – This information is intended to help the reader assess how MOSERS' funded status has changed over time.

Revenues Information

- *Required Employer Contribution Rates as a Percent of Payroll* – This information is intended to help the reader assess how MOSERS' contribution requirements have changed over time.

Operating & Economic Information

- *Membership in Retirement Plans* – This information is intended to help the reader assess how MOSERS' membership has changed over time.
- *Distribution of Benefit Recipients by Location* – This information is intended to help the reader evaluate where MOSERS distributes annuity payments.
- *Benefit Recipients by Type of Retirement and Option Elected* – This information is intended to help the reader understand the stratification of benefit payments by amount and elected option.
- *Benefits Tabulated by Type of Benefit and by Option* – This information is intended to help the reader understand the actuarially determined annual and average monthly benefit amounts by benefit type and option.
- *Average Monthly Benefit Amounts* – This information is intended to help the reader evaluate how benefit payments have changed over time. Figures have been stratified based on years of credited service.
- *Retirees and Beneficiaries Tabulated by Fiscal Year of Retirement* – This information is intended to help the reader understand how long current retirees have been in retirement.
- *Benefits Tabulated by Attained Ages of Benefit Recipients* – This information is intended to help the reader understand the actuarially determined annual and average monthly benefit amounts by type of recipient, and age of recipient.
- *Principal Participating Employers* – This information is intended to help the reader understand MOSERS' most significant sources of contribution revenue, and how it has changed over time.

2023	26.33	60.17
2024	27.26	59.83
2025	28.75	61.34

Note: In addition to the employer contribution rates, MOSERS also receives a fixed 4% employee contribution from MSEP 2011 and Judicial Plan 2011 members. Beginning in fiscal year 2023, the employers were given the option to prepay contributions at certain times during the year and receive an actuarially determined present value discount based on MOSERS' investment return assumption. Amounts are before any prepaid discounts.
