Board of Trustees
Missouri State Employee' Retirement System
907 Wildwood Drive
Jefferson City, Missouri 65109

Dear Board Members:

Presented in this report is information to assist the Missouri State Employees' Retirement System in meeting the requirements of the Governmental Accounting Standards Board (GASB) Statement No. 67. The information is presented for the June 30, 2018 Measurement Date. The calculations in this report have been made on a basis that is consistent with our understanding of this accounting standard (GASB 67). Please note that the discount rate used to determine the Total Pension Liability changed from 7.50% at the Prior Measurement Date to 7.25% at the current Measurement Date.

The annual actuarial valuation used as a basis for much of the information presented in this report was performed as of June 30, 2018. The valuation was based upon data, furnished by the System's staff, concerning active, inactive and retired members along with pertinent financial information. This information was reviewed for completeness and internal consistency, but was not audited by us. The valuation results depend on the integrity of the data. If any of the information is inaccurate or incomplete, our results may be different and our calculations may need to be revised. Please see the actuarial valuation for additional details on the funding requirements for the System including actuarial assumptions and methods and the funding policy.

To the best of our knowledge, the information contained in this report is complete and accurate. The calculations were performed by qualified actuaries according to generally accepted actuarial principles and practices, as well as in conformity with Actuarial Standards of Practice issued by the Actuarial Standards Board. The calculations are based on the current provisions of the System, and on actuarial assumptions that are internally consistent and individually reasonable based on the actual experience of the System. In addition, the calculations were completed in compliance with applicable law and, in our opinion, meet the requirements of GASB 67.

Board of Trustees
September 27, 2018
Page 2

These results are only for financial reporting and may not be appropriate for funding purposes or other types of analysis. Calculations for purposes other than satisfying the requirements of GASB 67 may produce significantly different results. Future actuarial results may differ significantly from the current results presented in this report due to such factors as changes in plan experience or changes in economic or demographic assumptions.

We, Patrice A. Beckham, FSA and Bryan K. Hoge, FSA, are members of the American Academy of Actuaries and meet the Qualification Standards to render the actuarial opinion contained herein. We are available to answer any questions on the material contained in this report or to provide explanations or further details as may be appropriate.

Respectfully submitted,

A handwritten signature in blue ink that reads 'Patrice Beckham' in a cursive script.

REPORT OF THE ANNUAL GASB STATEMENT NO. 67

MISSOURI STATE EMPLOYEES' RETIREMENT SYSTEM

SUMMARY OF PRINCIPAL RESULTS

Valuation Date (VD):	June 30, 2018
Prior Measurement Date:	June 30, 2017
Measurement Date (MD):	June 30, 2018
Membership Data:	
Retirees and Beneficiaries	48,207
Inactive Vested Members	16,386
Inactive Nonvested Members	15,619
Active Employees	<u>47,806</u>
Total	128,018
Single Equivalent Interest Rate (SEIR):	
Long-Term Expected Rate of Return	7.25%
Municipal Bond Index Rate at Prior Measurement Date	3.56%
Municipal Bond Index Rate at Measurement Date	3.89%
Year in which Fiduciary Net Position is Projected to be Depleted	N/A
Single Equivalent Interest Rate at Prior Measurement Date	7.50%
Single Equivalent Interest Rate at Measurement Date	7.25%
Net Pension Liability:	
Total Pension Liability (TPL)	\$13,612,763,961
Fiduciary Net Position (FNP)	<u>8,034,508,424</u>
Net Pension Liability (NPL = TPL – FNP)	\$5,578,255,537
FNP as a percentage of TPL	59.02%

INTRODUCTION

The Governmental Accounting Standards Board issued Statement No. 67 (GASB 67), *Financial Reporting for Pension Plans*, in June 2012. The effective date for reporting under GASB 67 for the Missouri State Employees' Retirement System was the fiscal year ending June 30, 2014. Based on the provisions of GASB 67, the Missouri State Employees' Retirement System (MOSERS or System) is a cost-sharing multiple employer defined benefit pension plan.

This report, prepared as of June 30, 2018 (the Measurement Date), presents information to assist the System in meeting the requirements of GASB 67. Much of the material provided in this report is based on the data, assumptions and results of the annual funding actuarial valuation of the System performed as of June 30, 2018 (the Valuation Date). The results of that valuation were detailed in a report dated September 7, 2018.

GASB 67 discloses the Total Pension Liability (TPL) utilizing the Entry Age Normal actuarial cost method. The Net Pension Liability (NPL) is equal to the TPL minus the System's Fiduciary Net Position (FNP) (basically the fair (market) value of assets). The benefit provisions recognized in the calculation of the TPL are summarized in Appendix B.

Among the items needed for the liability calculation is the discount rate, or Single Equivalent Interest Rate (SEIR), as described by GASB 67. To determine the SEIR, the FNP must be projected, using GASB 67 guidelines, into the future for as long as there are anticipated benefits payable under the plan's provisions applicable to the members and beneficiaries of the System on the Measurement Date. If the FNP is not projected to be depleted at any point in the future, the long-term expected rate of return on plan investments expected to be used to finance the benefit payments may be used as the SEIR.

If, however, the FNP is projected to be depleted at a future measurement date, the SEIR is determined as the single rate that will generate a present value of benefit payments equal to the sum of the present value determined by discounting all projected benefit payments through the date of depletion by the long-term expected rate of return, and the present value determined by discounting those benefits after the date of depletion by a 20-year tax-exempt municipal bond (rating AA/Aa or higher) rate. The rate used, if necessary, for this purpose is the monthly average of the Bond Buyers General Obligation 20-year Municipal Bond Index Rate (formerly published monthly by the Board of Governors of the Federal Reserve System).

Our calculations indicate that the FNP is not projected to be depleted, so the Municipal Bond Index Rate is not used in the determination of the SEIR for either the June 30, 2017 or the June 30, 2018 TPL. The SEIR for the Measurement Date is 7.25%, the long-term assumed rate of return on

investments. The SEIR for the Prior Measurement Date was 7.50%. Please see Paragraph 31.b.(1) for more explanation of the development of the SEIR.

The FNP projections are based upon the System's financial status on the Measurement Date, the indicated set of methods and assumptions, and the requirements of GASB 67. As such, the FNP projections are not reflective of the cash flows and asset accumulations that would occur on an ongoing plan basis, reflecting the impact of future members. Therefore, the results of this test do not necessarily indicate whether or not the System will actually run out of money, the financial condition of the System, or the System's ability to make benefit payments in future years.

The sections that follow provide the results of all the necessary calculations, presented in the order presented in GASB 67 for note disclosure and Required Supplementary Information (RSI).

SECTION I – NOTES TO FINANCIAL STATEMENTS

The material presented herein will follow the order presented in GASB 67. Paragraph numbers are provided for ease of reference.

Paragraphs 30.a. (1)-(3): This information will be supplied by the System.

Paragraph 30.a. (4): The data required regarding the membership of the System were furnished by the System. The following table summarizes the membership of the System as of June 30, 2018, the date of the valuation used to determine the June 30, 2018 TPL.

Membership

Number as of June 30, 2018	
Inactive Members Or Their Beneficiaries	48,207
Currently Receiving Benefits	
Inactive Members Entitled To But Not Yet Receiving Benefits	16,386
Inactive Nonvested Members	15,619
Active Members	47,806
Total	128,018

Paragraphs 30.a. (5)-(6) and Paragraphs 30.b.-f.: This information will be supplied by the System.

Paragraph 31.a. (1)-(4): As stated earlier, the NPL is equal to the TPL minus the FNP. That result, as of June 30, 2018, is presented in the following table.

Fiscal Year Ending June 30, 2018	
Total Pension Liability	\$ 13,612,763,961
Fiduciary Net Position	<u>8,034,508,424</u>
Net Pension Liability	\$ 5,578,255,537
Ratio of Fiduciary Net Position to Total Pension Liability	59.02%

Paragraph 31.b.: This paragraph requires information to be disclosed regarding the actuarial assumptions and other inputs used to measure the TPL. The complete set of actuarial assumptions and other inputs utilized in developing the TPL are outlined in Appendix C. The TPL as of June 30, 2018 was determined based on an actuarial valuation prepared as of June 30, 2018, using the following key actuarial assumptions and other inputs:

Price Inflation	2.50 percent
Payroll Growth	2.50 percent
Salary increases, including wage inflation	3.00 to 8.50 percent; General Assembly is assumed to only get wage inflation of 2.75 percent
Long-term Rate of Return, net of investment expense, including price inflation	7.25 percent
Municipal Bond Index Rate	
Prior Measurement Date	3.56 percent
Measurement Date	3.89 percent
Year FNP is projected to be depleted	N/A
Single Equivalent Interest Rate, net of investment expense, including price inflation	
Prior Measurement Date	7.50 percent
Measurement Date	7.25 percent
Cost-of-living adjustment	4.00%, compounded annually, when a minimum COLA of 4.00% is in effect. 2.00%, compounded annually, when no minimum COLA is in effect (80% of price inflation).
Mortality	Pre-retirement mortality rates were based on the RP-2014 Employee mortality table, projected from 2006 to 2026 with Scale MP-2015 (scaled by 95% for males and 90% for females). Post-retirement mortality rates were based on the RP-2014 Healthy Annuitant mortality table, projected from 2006 to 2026 with Scale MP-2015 and scaled by 120%.

Disabled mortality rates were based on the RP-2014 Disabled mortality table, projected from 2006 to 2026 with Scale MP-2015 (scaled by 95% for males and 90% for females).

The demographic actuarial assumptions used in the valuation are based on the results of the most recent complete actuarial experience study, which covered the five-year period ending June 30, 2015. The experience study report, performed by the prior actuary, is dated March 28, 2016. The economic actuarial assumptions used in the valuation are based on the results of the most recent economic experience study, which was performed in July, 2018.

Paragraph 31.b.(1)

(a) Discount rate (SEIR): The discount rate used to measure the TPL at June 30, 2018 was 7.25%. The discount rate used to measure the TPL at the Prior Measurement Date was 7.50%.

(b) Projected cash flows: The projection of cash flows used to determine the discount rate assumed that plan contributions from members and the employers will be made at the contribution rates as set in state statute:

- a. Employee contribution rate: 4.00% of salary for members hired on or after 1/1/2011; no contributions for members hired before 1/1/2011.
- b. Employer contribution rate: The actuarial required contribution rate including a minimum contribution rate that shall not fall below the rate set for fiscal year 2015 (16.97%), until the plan is at least 80% funded.
- c. Administrative expenses in the prior year were projected forward with price inflation as an estimate for administrative expenses in the current and future years. The portion of expenses in future years allocated to the current members was based on the proportionate share of covered payroll in each year for the remainder of the existing members to the total covered payroll for all members.

Based on those assumptions, the System's FNP was projected to be available to make all projected future benefit payments of current System members. Therefore, the long-term expected rate of return on System investments of 7.25% was applied to all periods of projected benefit payments to determine the TPL.

The FNP projections are based upon the System's financial status on the Measurement Date, the indicated set of methods and assumptions, and the requirements of GASB 67. As such, the FNP projections are not reflective of the cash flows and asset accumulations that would occur on an ongoing plan basis, reflecting the impact of future members. Therefore, the results of this test do not necessarily indicate whether or not the funds will actually run out of money, the financial condition of the System, or the System's ability to make benefit payments in future years.

- (c) **Long-term rate of return:** The long-term expected rate of return on pension plan investments is reviewed regularly as part of the experience study. The most recent economic experience analysis was performed and results provided in July, 2018. Generally, several factors are considered in evaluating the long-term rate of return assumption including long-term historical data, estimates inherent in current market data, and an analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation), along with estimates of variability and correlations for each asset class, were developed by the System’s investment consultant. These ranges were combined to develop the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The capital market assumptions developed by investment consultants are often intended for use over a 10-year investment horizon and are not always useful in setting the long-term rate of return for funding pension plans which covers a longer timeframe.
- (d) **Municipal bond rate:** A municipal bond rate was not used in determining the discount rate. If it were required, the rate would be 3.89% on the Measurement Date.
- (e) **Periods of projected benefit payments:** Projected future benefit payments for all current plan members were projected through 2117.
- (f) **Assumed asset allocation:** The target asset allocation and best estimates of real rates of return for each major asset class will be supplied by the System.
- (g) **Sensitivity analysis:** This paragraph requires disclosure of the sensitivity of the NPL to changes in the discount rate. The following presents the NPL of the System, calculated using the discount rate of 7.25 percent, as well as the System’s NPL calculated using a discount rate that is 1-percentage-point lower (6.25 percent) or 1-percentage-point higher (8.25 percent) than the current rate:

	1% Decrease (6.25%)	Current Discount Rate (7.25%)	1% Increase (8.25%)
Total Pension Liability	\$15,160,279,518	\$13,612,763,961	\$12,311,479,415
Fiduciary Net Position	<u>8,034,508,424</u>	<u>8,034,508,424</u>	<u>8,034,508,424</u>
Net Pension Liability	\$7,125,771,094	\$5,578,255,537	\$4,276,970,991

Paragraph 31.c.: The TPL at June 30, 2018 is based upon an actuarial valuation prepared as of June 30, 2018.

SECTION II – REQUIRED SUPPLEMENTARY INFORMATION

There are several tables of Required Supplementary Information (RSI) that need to be included in the System's financial statements:

Paragraphs 32.a.-c.: The required tables of schedules are provided in Appendix A.

Paragraph 32.d.: This information will be supplied by the System.

Paragraph 34: The following information should be noted regarding the RSI, particularly for the *Schedule of Employer Contributions*:

Changes of benefit and funding terms: The following changes were made by the Missouri Legislature and reflected in the valuation performed as of June 30 listed below:

2018: Legislation passed in the 2017 session allowed the MOSERS Board of Trustees to establish a voluntary buyout program prior to May 31, 2018 for terminated vested members (those who left state employment with a vested retirement benefit but prior to reaching retirement eligibility). The Board parameters for the buyout provided that eligible terminated vested members could elect to cash out their future monthly retirement benefit in exchange for a one-time lump sum payment equal to 60% of the actuarial present value of their retirement benefit amount.

2017: Senate Bill 62 (SB 62) made the following changes to the MSEP 2011 benefit provisions:

- Active members are now eligible for Normal Retirement at age 67 with 5 years of service (previously age 67 with 10 years of service).
- Active members are now eligible for Early Retirement at age 62 with 5 years of service (previously age 62 with 10 years of service).
- Active members are now vested after 5 years of service (previously 10 years of service).
- Cost-of-living adjustments for vested former members now commence on the second anniversary of the annuity starting date (previously commenced on first anniversary).
- Service credit for unused sick leave is only applied for members who terminate service at their early or normal retirement date.
- Survivor benefits for terminated vested members start at the date the member would have been eligible for normal retirement, not at date of death.

Changes in actuarial assumptions and methods:

6/30/2018 valuation:

- The investment return assumption was lowered from 7.50% to 7.25%.
- The payroll growth assumption was lowered from 3.00% to 2.50%.
- The wage growth assumption was lowered from 3.00% to 2.75%.
- The asset smoothing method was changed from an open 5-year smoothing method to a closed 5-year smoothing method, with the difference between the actual investment return and the expected investment return on the market value of assets recognized evenly over a closed 5-year period. Due to the change in the asset smoothing method, a transitional plan was necessary. This transitional plan recognizes the unrecognized investment experience as of June 30, 2017 evenly over a closed 7-year period.
- The Unfunded Actuarially Accrued Liability (UAAL) amortization method was changed from one base over a closed 30-year period that began June 30, 2014 to a “layered” approach first effective June 30, 2018. The “Legacy UAAL”, as determined in the June 30, 2018 valuation, is amortized over a closed 30-year period. Subsequent changes in the UAAL due to actuarial gains/losses or assumption changes are separately financed by establishing amortization bases and payments, as a level percentage of payroll, over closed 30-year periods. Any change in the System’s benefit structure shall be amortized over a closed period of 20 years, as set out in state statutes. The total UAAL amortization payment is the sum of the payments for each of the amortization bases.

6/30/2017 valuation:

- The investment return assumption was lowered from 7.65% to 7.50%.

6/30/2016 valuation:

- The long-term rate of return was lowered from 8.00% to 7.65%.
- Salary increases were changed from age based with increases between 3.2% and 5.9% to service based with increase between 3.25% and 8.75%.
- Post-retirement mortality table was updated from the RP-2000 combined healthy mortality table, projected to 2016 with Scale AA to the RP-2014 healthy annuitant mortality table, projected from 2006 to 2026 with Scale MP-2015 and scaled by 120%.
- Pre-retirement mortality table was updated from the RP-2000 combined healthy mortality table, projected to 2016 with Scale AA and scaled by 100% for males and 80% for females to the RP-2014 employee mortality table, projected from

2006 to 2026 with Scale MP-2015 and scaled by 95% for males and 90% for females.

- The disabled mortality table was updated from the RP-2000 combined healthy mortality table, projected to 2016 with Scale AA and set forward 10 years to the RP-2014 disabled mortality table, projected from 2006 to 2026 with Scale MP-2015 and scaled by 95% for males and 90% for females.
- Retirement rates were changed to better reflect actual experience of the System.
- The assumption for service credit for unused leave upon retirement and military service purchases was changed from 6 months to 8 months (4 months to 5 months for 2011 plan members).
- Withdrawal rates were changed to better reflect actual experience of the System.
- Disability rates were changed to better reflect actual experience of the System.
- Pre-retirement survivor benefits for spouse of terminated vested member liability loads were reduced.
- The married assumption at retirement was reduced from 75% to 70%.
- The married assumption for in-service deaths was reduced from 70% to 60%.
- The asset smoothing period changed from an open 3-year period to an open 5-year period.

6/30/2015 valuation:

- For the 2015 valuation only, the wage inflation was assumed to be 0% in the first year and 3% thereafter.

6/30/2014 valuation:

- The unfunded actuarial accrued liability amortization method was changed from a level percentage of payroll amortized over an open 30-year period to a level percentage of payroll amortized over a closed 30-year period beginning with the 6/30/2014 valuation.

Method and assumptions used in calculations of actuarially determined contributions.

The System is funded with contribution rates that are 4.00% of monthly salary for members hired on or after January 1, 2011 (0% for all other members) and an actuarially determined contribution rate for the State of Missouri (subject to a minimum rate of 16.97% until the System is 80% funded on an actuarial basis). The Actuarially Determined Contributions in the *Schedule of Employer Contributions* are calculated as of the fiscal year two years prior to which contributions are reported.

The following actuarial methods and assumptions were used to determine the Actuarially Determined Contribution reported for the most recent Measurement Date, June 30, 2018 (based on the June 30, 2016 actuarial valuation):

Actuarial cost method	Entry Age Normal
Amortization method	Level percentage of payroll, closed
Remaining amortization period	28 years
Asset valuation method	Open 5-year smoothing based on actual market return and expected actuarial return
Price Inflation	2.50 percent
Payroll Growth	3.00 percent
Salary increases, including inflation	3.25 to 8.75 percent
Long-term Rate of Return, net of investment expense, including price inflation	7.65 percent
Cost-of-living adjustment	4.00%, compounded annually, when a minimum COLA of 4.00% is in effect. 2.00%, compounded annually, when no minimum COLA is in effect (80% of price inflation).

Please see the information presented earlier in regard to Paragraph 34 for detailed information on the benefit changes and assumption changes that may have impacted the Actuarially Determined Contributions shown in the *Schedule of Employer Contributions*.

APPENDIX A

MSEP (Missouri State Employees' Plan)	MSEP 2000 (Missouri State Employees' Plan 2000)	MSEP 2011 (Missouri State Employees' Plan 2011)
<p>Members first hired prior to August 28, 1997 receive COLAs based on Formula 1 until an aggregate increase of 65% is reached. At that point subsequent COLAs based on Formula 2 are granted.</p> <p>Members first hired on or after August 28, 1997 receive COLAs based solely on Formula 2.</p> <p>Statewide Elected Officials with 12 or more years of service have their benefit adjusted annually based on the increase in the pay for an active statewide elected official in the member's highest elected position.</p> <p>Members who are fully vested and work beyond age 65 will have their monthly benefit increased upon retirement. The percentage increase in benefit is equal to all COLAs for the years between age 65 and date of retirement, not to exceed 65% and counts toward the Formula 1 65% maximum.</p>	<p><i>Statewide Elected Officials:</i> Benefit is adjusted annually based on the increase in the pay for an active statewide elected official in the retired member's highest elected position.</p> <p><i>General Employees:</i> Annual benefit percentage increase equal to the lesser of: i) 80% of the CPI increase, and 5%.</p> <p>CPI: For the basis of determining CPI, the average monthly reported CPI for the prior calendar year is divided by the average monthly reported CPI for the second prior calendar year to determine the current year increases, if any. If this amount is less than one, benefits are not reduced, nor is there any cumulative effect on future years determination of CPI.</p> <p>Timing of Increase: Benefits are adjusted on the anniversary of the effective date of retirement for most members. Members retiring under the BackDROP provisions have an anniversary based on the retroactive starting date for the BackDROP.</p>	<p><i>Statewide Elected Officials:</i> Benefit is adjusted annually based on the increase in the pay for an active statewide elected official in the retired member's highest elected position.</p> <p><i>General Employees:</i> Annual benefit percentage increase equal to the lesser of: i) 80% of the CPI increase, and 5%.</p> <p>CPI: For the basis of determining CPI, the average monthly reported CPI for the prior calendar year is divided by the average monthly reported CPI for the second prior calendar year to determine the current year increases, if any. If this amount is less than one, benefits are not reduced, nor is there any cumulative effect on future years determination of CPI.</p> <p>Timing of Increase: Benefits are adjusted on the anniversary of the effective date of retirement. For inactive vested General Employees who enter retirement, the first COLA will not be granted until the second anniversary of the effective date of retirement.</p>

MSEP (Missouri State Employees' Plan)	MSEP 2000 (Missouri State Employees' Plan 2000)	MSEP 2011 (Missouri State Employees' Plan 2011)
<p>Pop-up provision</p> <p>Benefits to members who choose a survivor form of payment and whose spouse precedes the member in death, will "pop-up" or revert to the amount the member would have received had he/she not elected a survivor option.</p> <p>Portability</p> <p>Purchase/Transfer Provisions (in addition to military). Effective August 28, 1999, a member may purchase up to four years of non-federal full-time Missouri public service, provided the member is not vested in another retirement system for that same service.</p>	<p>Same.</p> <p>Purchase/Transfer Provisions (in addition to military). A member may purchase up to four years of non-federal full-time Missouri public service, provided the member is not vested in another retirement system for that same service. Local vested service credit granted after 10 years of state service if the other retirement plan agrees to transfer assets equal to the accrued liability to MOSERS.</p>	<p>Same.</p> <p>May purchase qualifying public sector service at full actuarial cost.</p>

MSEP (Missouri State Employees' Plan)	MSEP 2000 (Missouri State Employees' Plan 2000)	MSEP 2011 (Missouri State Employees' Plan 2011)
<p>BackDROP</p> <p>To be eligible to participate in the BackDROP, a member must have been eligible to retire under normal retirement age and/or service conditions for at least two years. A retroactive starting date is established for BackDROP purposes which is the later of: 1) the member's normal retirement date or 2) five years prior to the annuity starting date under the retirement plan selected by the member.</p> <p>A member may elect the BackDROP period for the accumulation of the BackDROP account in 12 month increments prior to their actual retirement date or back to the earliest possible date. This results in a BackDROP period of one to five years depending upon the individual situation.</p> <p>A theoretical BackDROP account is accumulated that includes 90% of the value of the benefit payments that would have been paid during the BackDROP period had the member retired at the retroactive starting date with their respective option election. These payments include applicable post-retirement benefit increases.</p>	Same as MSEP.	Not eligible for the BackDROP.

MSEP (Missouri State Employees' Plan)	MSEP 2000 (Missouri State Employees' Plan 2000)	MSEP 2011 (Missouri State Employees' Plan 2011)
<p>The member is paid the resulting lump sum value of the BackDROP account as of the annuity starting date or as three equal annual installments beginning at the annuity starting date.</p> <p>The annuity benefit payable from the actual retirement date is computed with years of service and average pay as of the retroactive starting date for the BackDROP. Post-retirement benefit increases that occurred during the BackDROP period are applied in the calculation of the monthly annuity.</p>		

APPENDIX C

STATEMENT OF ACTUARIAL ASSUMPTIONS

ACTUARIAL ASSUMPTIONS

Economic Assumptions

1. Investment Return 7.25%, compounded annually, net of investment expenses.

Note: This assumption will change to 7.10% for the June 30, 2019 valuation and 6.95% for the June 30, 2020 valuation and thereafter, absent Board action.

2. Inflation 2.50% per year

Note: This assumption will change to 2.35% for the June 30, 2019 valuation and 2.25% for the June 30, 2020 valuation and thereafter, absent Board action.

3. Salary Increases Rates vary by service. Sample rates are as follows:

Years	Rates by Service			
	Inflation	Productivity	Merit	Total
1	2.50%	0.25%	5.75%	8.50 %
2	2.50	0.25	2.50	5.25
3	2.50	0.25	1.50	4.25
4	2.50	0.25	1.25	4.00
5	2.50	0.25	1.00	3.75
9	2.50	0.25	0.75	3.50
10	2.50	0.25	0.50	3.25
21+	2.50	0.25	0.25	3.00

4. Payroll Growth 2.50% per year

Note: This assumption will change to 2.35% for the June 30, 2019 valuation and 2.25% for the June 30, 2020 valuation and thereafter, absent Board action.

5. Cost-of-Living Adjustment (COLA) 4.00% on a compounded basis when a minimum COLA of 4.00% is in effect.

2.00% on a compounded basis when no minimum COLA is in effect.

Note: This assumption will change to 1.88% for the June 30, 2019 valuation and 1.80% for the June 30, 2020 valuation and thereafter, absent Board action.

6. Interest on Member Contributions 1.50% per year

7. Administrative Expenses Actual prior year expenses, included in normal cost rate.

Demographic Assumptions

1. Mortality

The mortality assumption includes an appropriate level of conservatism that reflects expected future mortality improvement.

a. Post-retirement

RP-2014 Healthy Annuitant mortality table, projected from 2006 to 2026 with Scale MP-2015 and scaled by 120%

b. Pre-retirement

RP-2014 Employee mortality table, projected from 2006 to 2026 with Scale MP-2015 and scaled by 95% for males and 90% for females

c. Long-term disability

RP-2014 Disabled mortality table, projected from 2006 to 2026 with Scale MP-2015 and scaled by 95% for males and 90% for females

2. Retirement Assumption

Retirement Age	Normal Retirement			MSEP 2011**	Retirement Age	Early Retirement		
	MSEP and MSEP 2000*					Percent Retiring	MSEP and MSEP 2000	MSEP 2011

Other Assumptions

- | | |
|--------------------------------|--|
| 1. Form of Payment | MSEP – 50% joint and survivor
MSEP 2000 and MSEP 2011 – Straight life annuity |
| 2. Marital Status | |
| a. Percent married | 70% married at retirement, 60% of those dying in active service are married |
| b. Spouse’s age | Females assumed to be three years younger than males. |
| 3. Pay Increase Timing | Beginning of the fiscal year. |
| 4. Decrement Timing | Decrements of all types are assumed to occur mid-year. |
| 5. Eligibility Testing | Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur. |
| 6. Benefit Service | Exact fractional service is used to determine the amount of the benefit payable. |
| 7. Decrement Relativity | Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects. |
| 8. Decrement Operation | Disability and withdrawal do not operate during normal retirement eligibility. |
| 9. Other Liability Adjustments | Pre-Retirement Survivor Benefits for Spouse of Terminated Vested Member |

Age	Male/Female
<30	1.57/1.31
30-39	1.24/1.13
40-49	1.09/1.05
>50	1.02/1.01

These factors are used to estimate the cost of immediate unreduced survivor annuities upon the death of a vested member.

- | | |
|--------------------------------|---|
| 10. Incidence of Contributions | Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made. New entrant normal cost |
|--------------------------------|---|

contributions are applied to the funding of new entrant benefits.

11. MSEP 2000 Election

All regular state employees hired on or before June 30, 2000 are assumed to elect MSEP 2000 prior to age 62 and MSEP on or after age 62. Elected Officials, General Assembly, and Uniformed Water Patrol Members hired before July 1, 2000 are assumed to elect MSEP at retirement.

12. Service Adjustment

It is assumed that each member will be granted 8 months of service credit, 4 months for unused leave upon retirement and 4 months for military service purchases. For members hired on or after January 1, 2011 it is assumed that each member will be granted 5 months for unused leave.

13. Forfeitures

MSEP - For those hired on or after January 1, 2011, 50% of state employees terminating at first vesting eligibility are assumed to take a refund and forfeit their deferred pension. This percentage decreases to 0% at first retirement eligibility.

14. Salary and Benefit Limits

For purposes of the valuation, no limits were applied to member compensation or benefits.

15. Commencement age for deferred vested benefit

Normal Retirement Date

Data Adjustments

Active and retired member data was reported as of May 31, 2018. It was brought forward to June 30, 2018 by adding one month of service for all active members, one month of contributions and interest for MSEP 2011 members, and the June COLA for certain retired members. Financial information continues to be reported as of June 30. This procedure was instituted to provide sufficient time for the Board of Trustees to certify the appropriate contribution rate prior to the October 1 statutory deadline.

Active members reported with less than a \$100 annualized salary were assumed to receive the average active member pay.

When the option of choosing plans is available, terminated vested members are reported with two records, one with benefits under the MSEP plan and one with benefits under the MSEP 2000 plan. Because it is unknown what the member will elect at retirement, both records are valued and the plan that produces the higher present value of future benefits is used for valuation purposes.

For any retired member who has elected a joint and survivor benefit yet has no beneficiary date of birth provided, it was assumed that the beneficiary is 3 years younger for male retirees and 3 years older for female retirees.

For members reported with no gender, the member is assumed to be male.

Due to limitations in our valuation program, members who are not eligible for normal retirement prior to age 85 had their date of birth adjusted.

TECHNICAL VALUATION PROCEDURES

Other Valuation Procedures

Salary increases are assumed to apply to annual amounts.

Decrementations are assumed to occur mid-year, except that immediate retirement is assumed for those who are at or above the age at which retirement rates are 100%. Standard adjustments are made for multiple decrementations.

No actuarial liability is included for participants who terminated without being vested prior to the valuation date, except those due a refund of contributions.

Board of Trustees
Missouri State Employee' Retirement System
907 Wildwood Drive
Jefferson City, Missouri 65109

Dear Board Members:

Presented in this report is information to assist the Missouri State Employees' Retirement System in meeting the requirements of the Governmental Accounting Standards Board (GASB) Statement No. 67 for the Judges plan. The information is presented for the June 30, 2018 Measurement Date. The calculations in this report have been made on a basis that is consistent with our understanding of this accounting standard (GASB 67). Please note that the discount rate used to determine the Total Pension Liability changed from 7.50% at the Prior Measurement Date to 7.25% at the current Measurement Date.

The annual actuarial valuation used as a basis for much of the information presented in this report was performed as of June 30, 2018. The valuation was based upon data, furnished by the System's staff, concerning active, inactive and retired members along with pertinent financial information. This information was reviewed for completeness and internal consistency, but was not audited by us. The valuation results depend on the integrity of the data. If any of the information is inaccurate or incomplete, our results may be different and our calculations may need to be revised. Please see the actuarial valuation for additional details on the funding requirements for the System including actuarial assumptions and methods and the funding policy.

To the best of our knowledge, the information contained in this report is complete and accurate. The calculations were performed by qualified actuaries according to generally accepted actuarial principles and practices, as well as in conformity with Actuarial Standards of Practice issued by the Actuarial Standards Board. The calculations are based on the current provisions of the System, and on actuarial assumptions that are internally consistent and individually reasonable based on the actual experience of the System. In addition, the calculations were completed in compliance with applicable law and, in our opinion, meet the requirements of GASB 67.

Board of Trustees
September 27, 2018
Page 2

These results are only for financial reporting and may not be appropriate for funding purposes or other types of analysis. Calculations for purposes other than satisfying the requirements of GASB 67 may produce significantly different results. Future actuarial results may differ significantly from the current results presented in this report due to such factors as changes in plan experience or changes in economic or demographic assumptions.

We, Patrice A. Beckham, FSA and Bryan K. Hoge, FSA, are members of the American Academy of Actuaries and meet the Qualification Standards to render the actuarial opinion contained herein. We are available to answer any questions on the material contained in this report or to provide explanations or further details as may be appropriate.

Respectfully submitted,

MISSOURI STATE EMPLOYEES' RETIREMENT SYSTEM

SUMMARY OF PRINCIPAL RESULTS

Valuation Date (VD):	June 30, 2018
Prior Measurement Date:	June 30, 2017
Measurement Date (MD):	June 30, 2018
Membership Data:	
Retirees and Beneficiaries	569
Inactive Vested Members	26
Inactive Nonvested Members	0
Active Employees	<u>415</u>
Total	1,010
Single Equivalent Interest Rate (SEIR):	
Long-Term Expected Rate of Return	7.25%
Municipal Bond Index Rate at Prior Measurement Date	3.56%
Municipal Bond Index Rate at Measurement Date	3.89%
Year in which Fiduciary Net Position is Projected to be Depleted	N/A
Single Equivalent Interest Rate at Prior Measurement Date	7.50%
Single Equivalent Interest Rate at Measurement Date	7.25%
Net Pension Liability:	
Total Pension Liability (TPL)	\$593,788,592
Fiduciary Net Position (FNP)	<u>150,199,575</u>
Net Pension Liability (NPL = TPL – FNP)	\$443,589,017
FNP as a percentage of TPL	25.30%

INTRODUCTION

The Governmental Accounting Standards Board issued Statement No. 67 (GASB 67), *Financial Reporting for Pension Plans*, in June 2012. The effective date for reporting under GASB 67 for the Missouri State Employees' Retirement System for Judges was the fiscal year ending June 30, 2014. Based on the provisions of GASB 67, the Missouri State Employees' Retirement System for Judges (Judges or System) is a single-employer defined benefit pension plan.

This report, prepared as of June 30, 2018 (the Measurement Date), presents information to assist the System in meeting the requirements of GASB 67. Much of the material provided in this report is based on the data, assumptions and results of the annual funding actuarial valuation of the System performed as of June 30, 2018 (the Valuation Date). The results of that valuation were detailed in a report dated September 7, 2018.

GASB 67 discloses the Total Pension Liability (TPL) utilizing the Entry Age Normal actuarial cost method. The Net Pension Liability (NPL) is equal to the TPL minus the System's Fiduciary Net Position (FNP) (basically the fair (market) value of assets). The benefit provisions recognized in the calculation of the TPL are summarized in Appendix B.

Among the items needed for the liability calculation is the discount rate, or Single Equivalent Interest Rate (SEIR), as described by GASB 67. To determine the SEIR, the FNP must be projected, using GASB 67 guidelines, into the future for as long as there are anticipated benefits payable under the plan's provisions applicable to the members and beneficiaries of the System on the Measurement Date. If the FNP is not projected to be depleted at any point in the future, the long-term expected rate of return on plan investments expected to be used to finance the benefit payments may be used as the SEIR.

If, however, the FNP is projected to be depleted at a future measurement date, the SEIR is determined as the single rate that will generate a present value of benefit payments equal to the sum of the present value determined by discounting all projected benefit payments through the date of depletion by the long-term expected rate of return, and the present value determined by discounting those benefits after the date of depletion by a 20-year tax-exempt municipal bond (rating AA/Aa or higher) rate. The rate used, if necessary, for this purpose is the monthly average of the Bond Buyers General Obligation 20-year Municipal Bond Index Rate (formerly published monthly by the Board of Governors of the Federal Reserve System).

Our calculations indicate that the FNP is not projected to be depleted, so the Municipal Bond Index Rate is not used in the determination of the SEIR for either the June 30, 2017 or the June 30, 2018

TPL. The SEIR for the Measurement Date is 7.25%, the long-term assumed rate of return on investments. The SEIR for the Prior Measurement Date was 7.50%. Please see Paragraph 31.b.(1) for more explanation of the development of the SEIR.

The FNP projections are based upon the System's financial status on the Measurement Date, the indicated set of methods and assumptions, and the requirements of GASB 67. As such, the FNP projections are not reflective of the cash flows and asset accumulations that would occur on an ongoing plan basis, reflecting the impact of future members. Therefore, the results of this test do not necessarily indicate whether or not the System will actually run out of money, the financial condition of the System, or the System's ability to make benefit payments in future years.

The sections that follow provide the results of all the necessary calculations, presented in the order presented in GASB 67 for note disclosure and Required Supplementary Information (RSI).

SECTION I – NOTES TO FINANCIAL STATEMENTS

The material presented herein will follow the order presented in GASB 67. Paragraph numbers are provided for ease of reference.

Paragraphs 30.a. (1)-(3): This information will be supplied by the System.

Paragraph 30.a. (4): The data required regarding the membership of the System were furnished by the System. The following table summarizes the membership of the System as of June 30, 2018, the date of the valuation used to determine the June 30, 2018 TPL.

Membership

Number as of June 30, 2018	
Inactive Members Or Their Beneficiaries	569
Currently Receiving Benefits	
Inactive Members Entitled To But Not Yet Receiving Benefits	26
Inactive Nonvested Members	0
Active Members	415
Total	1,010

Paragraphs 30.a. (5)-(6) and Paragraphs 30.b.-f.: This information will be supplied by the System.

Paragraph 31.a. (1)-(4): As stated earlier, the NPL is equal to the TPL minus the FNP. That result, as of June 30, 2018, is presented in the following table.

Fiscal Year Ending June 30, 2018	
Total Pension Liability	\$ 593,788,592
Fiduciary Net Position	<u>150,199,575</u>
Net Pension Liability	\$ 443,589,017
Ratio of Fiduciary Net Position to Total Pension Liability	25.30%

Paragraph 31.b.: This paragraph requires information to be disclosed regarding the actuarial assumptions and other inputs used to measure the TPL. The complete set of actuarial assumptions and other inputs utilized in developing the TPL are outlined in Appendix C. The TPL as of June 30, 2018 was determined based on an actuarial valuation prepared as of June 30, 2018, using the following key actuarial assumptions and other inputs:

Price Inflation	2.50 percent
Payroll Growth	2.50 percent
Salary increases, including wage inflation	2.75 to 4.95 percent
Long-term Rate of Return, net of investment expense, including price inflation	7.25 percent
Municipal Bond Index Rate	
Prior Measurement Date	3.56 percent
Measurement Date	3.89 percent
Year FNP is projected to be depleted	N/A
Single Equivalent Interest Rate, net of investment expense, including price inflation	
Prior Measurement Date	7.50 percent
Measurement Date	7.25 percent
Cost-of-living adjustment	4.00%, compounded annually, when a minimum COLA of 4.00% is in effect. 2.00%, compounded annually, when no minimum COLA is in effect (80% of price inflation).
Mortality	Pre-retirement mortality rates were based on the RP-2014 Employee mortality table, projected from 2006 to 2026 with Scale MP-2015. Post-retirement mortality rates were based on the RP-2014 Healthy Annuitant mortality table, projected from 2006 to 2026 with Scale MP-2015 and scaled by 98%. Disabled mortality rates were based on the RP-2014 Disabled mortality table, projected from 2006 to 2026 with Scale MP-2015.

The demographic actuarial assumptions used in the valuation are based on the results of the most recent complete actuarial experience study, which covered the five-year period ending June 30, 2015. The experience study report, performed by the prior actuary, is dated March 28, 2016. The economic actuarial assumptions used in the valuation are based on the results of the most recent economic experience study, which was performed in July, 2018.

Paragraph 31.b.(1)

(a) Discount rate (SEIR): The discount rate used to measure the TPL at June 30, 2018 was 7.25%. The discount rate used to measure the TPL at the Prior Measurement Date was 7.50%.

(b) Projected cash flows: The projection of cash flows used to determine the discount rate assumed that plan contributions from members and the State of Missouri will be made at the contribution rates as set in state statute:

- a. Employee contribution rate: 4.00% of salary for members hired on or after 1/1/2011; no contributions for members hired before 1/1/2011.
- b. Employer contribution rate: The actuarial required contribution rate including a minimum contribution rate that shall not fall below the rate set for fiscal year 2015 (58.45%), until the plan is at least 80% funded.
- c. Administrative expenses in the prior year were projected forward with price inflation as an estimate for administrative expenses in the current and future years. The portion of expenses in future years allocated to the current members was based on the proportionate share of covered payroll in each year for the remainder of the existing members to the total covered payroll for all members.

Based on those assumptions, the System's FNP was projected to be available to make all projected future benefit payments of current System members. Therefore, the long-term expected rate of return on System investments of 7.25% was applied to all periods of projected benefit payments to determine the TPL.

The FNP projections are based upon the System's financial status on the Measurement Date, the indicated set of methods and assumptions, and the requirements of GASB 67. As such, the FNP projections are not reflective of the cash flows and asset accumulations that would occur on an ongoing plan basis, reflecting the impact of future members. Therefore, the results of this test do not necessarily indicate whether or not the funds will actually run out of money, the financial condition of the System, or the System's ability to make benefit payments in future years.

- (c) **Long-term rate of return:** The long-term expected rate of return on pension plan investments is reviewed regularly as part of the experience study. The most recent economic experience analysis was performed and results provided in July, 2018. Generally, several factors are considered in evaluating the long-term rate of return assumption including long-term historical data, estimates inherent in current market data, and an analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation), along with estimates of variability and correlations for each asset class, were developed by the System’s investment consultant. These ranges were combined to develop the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The capital market assumptions developed by investment consultants are often intended for use over a 10-year investment horizon and are not always useful in setting the long-term rate of return for funding pension plans which covers a longer timeframe.
- (d) **Municipal bond rate:** A municipal bond rate was not used in determining the discount rate. If it were required, the rate would be 3.89% on the Measurement Date.
- (e) **Periods of projected benefit payments:** Projected future benefit payments for all current plan members were projected through 2117.
- (f) **Assumed asset allocation:** The target asset allocation and best estimates of real rates of return for each major asset class will be supplied by the System.
- (g) **Sensitivity analysis:** This paragraph requires disclosure of the sensitivity of the NPL to changes in the discount rate. The following presents the NPL of the System, calculated using the discount rate of 7.25 percent, as well as the System’s NPL calculated using a discount rate that is 1-percentage-point lower (6.25 percent) or 1-percentage-point higher (8.25 percent) than the current rate:

	1% Decrease (6.25%)	Current Discount Rate (7.25%)	1% Increase (8.25%)
Total Pension Liability	\$654,845,166	\$593,788,592	\$541,577,783
Fiduciary Net Position	<u>150,199,575</u>	<u>150,199,575</u>	<u>150,199,575</u>
Net Pension Liability	\$504,645,591	\$443,589,017	\$391,378,208

Paragraph 31.c.: The TPL at June 30, 2018 is based upon an actuarial valuation prepared as of June 30, 2018.

SECTION II – REQUIRED SUPPLEMENTARY INFORMATION

There are several tables of Required Supplementary Information (RSI) that need to be included in the System's financial statements:

Paragraphs 32.a.-c.: The required tables of schedules are provided in Appendix A.

Paragraph 32.d.: This information will be supplied by the System.

Paragraph 34: The following information should be noted regarding the RSI, particularly for the *Schedule of Employer Contributions*:

Changes of benefit and funding terms: The following changes were made by the Missouri Legislature and reflected in the valuation performed as of July 1 listed below:

None

Changes in actuarial assumptions and methods:

6/30/2018 valuation:

- The investment return assumption was lowered from 7.50% to 7.25%.
- The payroll growth assumption was lowered from 3.00% to 2.50%.
- The wage growth assumption was lowered from 3.00% to 2.75%.
- The asset smoothing method was changed from an open 5-year smoothing method to a closed 5-year smoothing method, with the difference between the actual investment return and the expected investment return on the market value of assets recognized evenly over a closed 5-year period. Due to the change in the asset smoothing method, a transitional plan was necessary. This transitional plan recognizes the unrecognized investment experience as of June 30, 2017 evenly over a closed 7-year period.
- The Unfunded Actuarially Accrued Liability (UAAL) amortization method was changed from one base over a closed 30-year period that began June 30, 2014 to a "layered" approach first effective June 30, 2018. The "Legacy UAAL", as determined in the June 30, 2018 valuation, is amortized over a closed 30-year period. Subsequent changes in the UAAL due to actuarial gains/losses or assumption changes are separately financed by establishing amortization bases and payments, as a level percentage of payroll, over closed 30-year periods. Any change in the System's benefit structure shall be amortized over a closed period

of 20 years, as set out in state statutes. The total UAAL amortization payment is the sum of the payments for each of the amortization bases.

6/30/2017 valuation:

- The investment return assumption was lowered from 7.65% to 7.50%.

6/30/2016 valuation:

- The long-term rate of return was lowered from 8.00% to 7.65%.
- Post-retirement mortality table was updated from the RP-2000 combined healthy mortality table, projected to 2016 with Scale AA to the RP-2014 healthy annuitant mortality table, projected from 2006 to 2026 with Scale MP-2015 and scaled by 98%.
- Pre-retirement mortality table was updated from the RP-2000 combined healthy mortality table, projected to 2016 with Scale AA to the RP-2014 employee mortality table, projected from 2006 to 2026 with Scale MP-2015.
- The disabled mortality table was updated from the RP-2000 combined healthy mortality table, projected to 2016 with Scale AA and set forward 10 years to the RP-2014 disabled mortality table, projected from 2006 to 2026 with Scale MP-2015.
- Retirement rates were changed to better reflect actual experience of the System.
- Withdrawal rates were changed to better reflect actual experience of the System.
- The marriage assumption at retirement was increased from 70% to 80%.
- The marriage assumption for in-service deaths was increased from 70% to 80%.
- The asset smoothing period changed from an open 3-year period to an open 5-year period.

6/30/2014 valuation:

- For the 2014 valuation only, a one-time adjustment to the payroll growth from 3.00% to 14.38% was assumed for the year after the valuation date to reflect the average planned salary increase for 2015.
- The unfunded actuarial accrued liability amortization method was changed from a level percentage of payroll amortized over an open 30-year period to a level percentage of payroll amortized over a closed 30-year period beginning with the 6/30/2014 valuation.

Method and assumptions used in calculations of actuarially determined contributions.

The System is funded with contribution rates that are 4.00% of monthly salary for members hired on or after January 1, 2011 (0% for all other members) and an actuarially determined rate for the State of Missouri (subject to a minimum rate of 58.45% until the System is 80% funded on an actuarial basis). The Actuarially Determined Contributions in the *Schedule of Employer Contributions* are calculated as of the fiscal year two years prior to which contributions are reported.

The following actuarial methods and assumptions were used to determine the Actuarially Determined Contribution reported for the most recent Measurement Date, June 30, 2018 (based on the June 30, 2016 actuarial valuation):

Actuarial cost method	Entry Age Normal
Amortization method	Level percentage of payroll, closed
Remaining amortization period	28 years
Asset valuation method	Open 5-year smoothing based on actual market return and expected actuarial return
Price Inflation	2.50 percent
Payroll Growth	3.00 percent
Salary increases, including inflation	3.00 to 5.20 percent
Long-term Rate of Return, net of investment expense, including price inflation	7.65 percent
Cost-of-living adjustment	4.00%, compounded annually, when a minimum COLA of 4.00% is in effect. 2.00%, compounded annually, when no minimum COLA is in effect (80% of price inflation).

Please see the information presented earlier in regard to Paragraph 34 for detailed information on the benefit changes and assumption changes that may have impacted the Actuarially Determined Contributions shown in the *Schedule of Employer Contributions*.

APPENDIX A

REQUIRED SUPPLEMENTARY INFORMATION

Annual contribution deficiency (excess)	<u>\$0</u>	<u>(\$1,576,116)</u>	<u>\$0</u>	<u>\$0</u>	<u>\$0</u>
Covered payroll	\$59,417,302	\$58,591,661	\$57,421,016	\$55,656,457	\$49,587,936
Actual contributions as a percentage of covered payroll	62.09%	58.45%	58.59%	58.75%	59.02%

Note: Information prior to 2017 was produced by the prior actuary.

APPENDIX B

SUMMARY OF BENEFIT PROVISIONS VALUED

Age and Service Retirement

Eligibility for Unreduced Benefit (for Members Hired Before 1/1/2011)

The earliest of attaining:

- (1) At least 62 with 12 years of creditable service.
- (2) At least 60 with 15 years of creditable service.
- (3) At least 55 with 20 years of creditable service.

Eligibility for Unreduced Benefit (for Members Hired On or After 1/1/2011)

The earliest of attaining:

- (1) At least 67 with 12 years of creditable service.
- (2) At least 62 with 20 years of creditable service.

Benefit Amount

50% of compensation

Early Retirement

Eligibility for Reduced Benefit (for Members Hired Before 1/1/2011)

Age 60

Benefit Amount

- (1) If between 60 and 62, years of service divided by 15 multiplied by 50% of compensation.
- (2) If at least 62, years of service divided by 12 and multiplied by 50% of compensation.

Eligibility for Reduced Benefit (for Members Hired On or After 1/1/2011)

Age 62

Benefit Amount

- (1) If between 60 and 67, years of service divided by 20 multiplied by 50% of compensation.
- (2) If at least 67, years of service divided by 12 and multiplied by 50% of compensation.

Compensation used for Benefit Determination

The annual salary at date of termination of the highest position held.

Vested Deferred Benefits

Benefits for employees who terminate prior to eligibility for an immediate benefit are considered to be vested. Benefits commence once the individual qualifies for normal or early retirement based on age and service.

Death Benefits

Death Prior to Retirement

50% of the benefit the member would have been eligible to receive based on service to age 70 is payable to an eligible spouse or minor children.

Death After Retirement

50% of the benefit the retired member was receiving at the date of death to an eligible surviving spouse for members hired before January 1, 2011.

Disability Benefits

Disability benefits become payable at the time the member is eligible for normal retirement (50% of salary for remainder of term) and are computed based on the service that would have accrued if active employment had continued until normal retirement age, and member's compensation while an active employee.

Post-Retirement Benefit Adjustments

Benefits are increased to benefit recipients (including survivors) annually in accordance with the following formulas:

Increase in CPI	Formula 1 Benefit Increase	Formula 2 Benefit Increase
5.00% or less	4.00%	80% of CPI increase
5.01% - 6.24%	80% of CPI increase	80% of CPI increase
6.25% or more	5.00%	5.00%

Members first hired prior to August 28, 1997 receive COLAs based on Formula 1 until an aggregate increase of 65% is reached. At that point, subsequent COLAs based on Formula 2 are granted.

Members first hired on or after August 28, 1997 receive COLAs based solely on Formula 2.

Members hired prior to January 1, 2011 who work beyond the later of age 60 or the date when first eligible for age and service retirement will have their monthly benefit increased upon retirement. The percentage increase is equal to all COLAs for the years between (i) the later of age 60 or the date when first eligible for age and service retirement and (ii) date of actual retirement, not to exceed 65%.

Member Contributions

For members hired prior to 1/1/2011:	None
For members hired on or after 1/1/2011:	4.00% of salary, with interest credited at the 52-week Treasury bill rate.

APPENDIX C

STATEMENT OF ACTUARIAL ASSUMPTIONS

1. Investment Return 7.25%, compounded annually, net of investment expenses.

Note: This assumption will change to 7.10% for the June 30, 2019 valuation and 6.95% for the June 30, 2020 valuation and thereafter, absent Board action.

2. Inflation 2.50% per year

Note: This assumption will change to 2.35% for the June 30, 2019 valuation and 2.25% for the June 30, 2020 valuation and thereafter, absent Board action.

3. Salary Increases

Sample Ages	Merit & Seniority	Base (Economy)	Increase Next Year
25	2.20 %	2.75 %	4.95 %
30	2.20	2.75	4.95
35	1.48	2.75	4.23
40	0.76	2.75	3.51
45	0.60	2.75	3.35
50	0.54	2.75	3.29
55	0.44	2.75	3.19
60	0.00	2.75	2.75
65	0.00	2.75	2.75
70	0.00	2.75	2.75

4. Payroll Growth 2.50% per year

Note: This assumption will change to 2.35% for the June 30, 2019 valuation and 2.25% for the June 30, 2020 valuation and thereafter, absent Board action.

5. Cost-of-Living Adjustment (COLA) 4.00% on a compounded basis when a minimum COLA of 4.00% is in effect.

2.00% on a compounded basis when no minimum COLA is in effect.

Note: This assumption will change to 1.88% for the June 30, 2019 valuation and 1.80% for the June 30, 2020 valuation and thereafter, absent Board action.

6. Interest on Member Contributions 1.50% per year

7. Administrative Expenses Actual prior year expenses, included in normal cost rate.

Demographic Assumptions

1. Mortality

The mortality assumption includes an appropriate level of conservatism that reflects expected future mortality improvement.

a. Post-retirement

RP-2014 Healthy Annuitant mortality table, projected from 2006 to 2026 with Scale MP-2015 and scaled by 98%

b. Pre-retirement

RP-2014 Employee mortality table, projected from 2006 to 2026 with Scale MP-2015

c. Long-term disability

RP-2014 Disabled mortality table, projected from 2006 to 2026 with Scale MP-2015

Sample Ages	Pre-Retirement Mortality Rates*	
	Males	Females
25	0.03%	0.01%
30	0.03	0.02
35	0.04	0.03
40	0.05	0.04
45	0.07	0.05
50	0.13	0.09
55	0.24	0.16
60	0.42	0.23
65	0.74	0.33
70	1.23	0.55

* The pre-retirement mortality table used was the RP-2014 Employee mortality table, projected from 2006 to 2026 with Scale MP-2015.

2. Retirement Assumption

Retirement Age	<u>Hired Before 1/1/2011</u>				<u>Hired On or After 1/1/2011</u>		
	Normal Retirement		Early Retirement		Retirement Age	Normal Retirement	
	Male	Female	Male	Female		Male	Female
55	20%	3%					
56	16%	3%					
57	13%	3%					
58	9%	3%					
59	5%	3%					
60	8%	8%					
61	5%	8%					
62	8%	8%	6%	3%	62	30%	35%
63	10%	8%	6%	3%	63	20%	20%
64	12%	8%	6%	3%	64	15%	20%
65	12%	15%	6%	3%	65	30%	50%
66	20%	15%	6%	3%	66	25%	25%
67	20%	15%	6%	3%	67	20%	25%
68	30%	15%	6%	3%	68	20%	25%
69	30%	15%	6%	3%	69	30%	50%
70	100%	100%	100%	100%	70	100%	100%

3. Disability Assumption

Sample Ages	Sample	
	Males	Females
25	0.01 %	0.01 %
30	0.02	0.01
35	0.03	0.02
40	0.04	0.03
45	0.05	0.04
50	0.08	0.07
55	0.13	0.12
60	0.20	0.19
65	0.20	0.19
70	0.20	0.19

4. Termination Assumption

Service Index	Percent of Active Members Separating within the Next Year	
	Withdrawal	
	Males	Females
1	0.040 %	0.040 %
2	0.010	0.023
3	0.013	0.023
4	0.013	0.023
5	0.013	0.023
6-10	0.013	0.023
11-15	0.017	0.023
16+	0.010	0.010

Other Assumptions

- | | |
|--------------------------------|--|
| 1. Form of Payment | Hired before 1/1/2011 – 50% joint and survivor
Hired on or after 1/1/2011 – Straight life annuity |
| 2. Marital Status | |
| a. Percent married | 100% married |
| b. Spouse’s age | Females assumed to be four years younger than males. |
| 3. Pay Increase Timing | Beginning of the fiscal year. |
| 4. Decrement Timing | Decrements of all types are assumed to occur mid-year. |
| 5. Eligibility Testing | Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur. |
| 6. Benefit Service | Exact fractional service is used to determine the amount of the benefit payable. |
| 7. Decrement Relativity | Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects. |
| 8. Decrement Operation | Disability and withdrawal do not operate during normal retirement eligibility. |
| 9. Other Liability Adjustments | None |

- | | |
|--|---|
| 10. Incidence of Contributions | Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made. New entrant normal cost contributions are applied to the funding of new entrant benefits. |
| 11. Forfeitures | No vested member are assumed to take a refund of employee contributions. |
| 12. Salary and Benefit Limits | For purposes of the valuation, no limits were applied to member compensation or benefits. |
| 13. Commencement age for deferred vested benefit | Normal retirement age |

Data Adjustments

Active and retired member data was reported as of May 31, 2018. It was brought forward to June 30, 2018 by adding one month of service for all active members, one month of contributions and interest for Judicial Plan 2011 members, and the June COLA for certain retired members. Financial information continues to be reported as of June 30. This procedure was instituted to provide sufficient time for the Board of Trustees to certify the appropriate contribution rate prior to the October 1 statutory deadline.

Active members reported with no annualized salary were assumed to receive the average active member pay.

TECHNICAL VALUATION PROCEDURES

Other Valuation Procedures

Salary increases are assumed to apply to annual amounts.

Decrement are assumed to occur mid-year, except that immediate retirement is assumed for those who are at or above the age at which retirement rates are 100%. Standard adjustments are made for multiple decrements.

No actuarial liability is included for participants who terminated without being vested prior to the valuation date, except those due a refund of contributions.
